FOREWORD

POLITICAL events shape the destiny of a country. For Sarawak and Sabah, the greatest happening was joining Malaysia and becoming independent 18 years ago.

Prior to 1963, little progress was made. The great changes that have taken place since then bear testimony to the glant fruit both Sarawak and Sakah have reaped by being part of Malaysia. It is no exaggeration to say that the progress we have made in the last 18 years far exceeds that in all the years under the colonial rule out tosether.

Admittedly, there are still things to be done and problems to be tackled. But with determination and hard work, our nation, though young but so rich in natural resources, will stride to greater prosperity.

"18 YEARS IN MALAYSIA: 1963-1981" by no means gives the full account of the tremendous development that has taken place on the land of Sarawak and Sabah. It provides, indeed, only a glimpse into the vast progress that has brought immense social and economic benefits to the 2.5 million East Malaysians.

We dedicate this book to all who share the wish that the peace and prosperity we now enjoy will continue for many more years.

We thank the Information Department of both Sarawak and Sabah, other government departments and agencies for their invaluable assistance. We are deeply indebted to our advertisers for their generous support in the production of this book.

Our special thanks to Datuk Haji Mohd. Noor Mansoor and Datuk Dr. Wong Soon Kai for their kind assistance and messages.

TYT YANG DI-PERTUA NEGERI OF SARAWAK TUN DATUK PATINGGI ABANG HAJI MOHD. SALAHUDDIN

TUN Datuk Patinggi Abang Haji Mohd. Salahuddin is a Head of State who rules with a wealth of experiences and a deep fondness for his subjects.

He left school just before the Japanese occupation in 1941 and worked as a Probationary Health Inspector. After the Second World War, he served as Probationary Municipal Inspector until Oct. 1974. Two years later, he joined the National Registration Dept. He was transferred to P. W.D. in 1952 and in 1963, he resigned to contest the general elections. He was elected an Assemblyman but quit in 1968 to rejoin P.W.D. He was Chief Clerk of District Office, Sibu.

Tun Salahuddin was appointed Tua Kampong at 31 and was made Pemanca later when the Ketua Masyarakat Scheme came into effect. In Jan. 1974, he was appointed Chairman of the State Public Service Commission.

Before Malaysia was formed, he played an active role in Sarawak politics, helping to found Barisan Pemuda Sarawak (BPS) and Parti Barisan Rakyat Jati Sarawak (BERJASA). He represented the Melanau Community to put forward their views to the Cabbold Commission.

He was sworn in as 3rd Yang di-Pertua Negeri on April 21, 1977.

Tun Salahuddin is active in welfare work.

It is a member of Prisoners' Aid Society; SecretaryGeneral of Sibu Melanau Mutual Aid Society;
Treasurer of Management Committee of Abang
Ali School, Sibu District Relief Committee; a
member of Sibu Boys' Club, Divisional Youth
Council, Sibu Boys' Scout Asson, British Red Cross
Society, Malay Melanau Asson, and Chairman of
Melanau Asson. Sarawak
He is a member of
Sarawak Land Development Board of Directors
and Judicial and Legal Service Commission.

Born on Aug. 27, 1921 at Kampong Nangka, Sibu, he is married to Datin Patinggi Dayang Hajjah Umi Kalthum. They have one boy and eight girls. Award: SMN.

Address: Istana, Kuching, Sarawak.

TYT YANG DI-PERTUA NEGERI OF SABAH TUN DATUK PATINGGI MOHAMMAD ADNAN ROBERT

SINCE being appointed Sabah's Sixth Yang di-Pertua Negeri on June 27, 1978, Tun Datuk Patinggi Mohd. Adnan Robert has travelled extensively in the State and shown himself to be a ruler close to his people.

Before that, he has served the Government in various capacities. He started his career as a trainee dresser in Sandakan on July 1, 1937. He served in Ranau, Keningau and Kota Kinabalu from 1939 to 1945. On Jan. 1, 1951, he was appointed Deputy Assistant District Officer in Pensiangan and was later transferred to Papar as District Officer in 1965.

In the same year, under the Federal Officers Exchange Programme, Tun Adnan was appointed ADO of Kampar, Perak. Upon his return in Sabah in 1968, he became State Development Secretary in Finance Ministry. In Oct. 1968, he was appointed as Permanent Secretary to the State Ministry of Health which position he had held until his retirement at the end of 1972.

Born on Sept. 10, 1917 in Keningau, Tun Adnan was married to Toh Puan Mariam. They have six children — three sons and three girls.

On June 6, 1979, he was conferred Seri Maharaja Mangku Negara (SMN) which carries the title of Tun by H.M. the King on his birthday honours list. He was awarded Datuk Patinggi Bintang Kenyalang (D.P.) which carried the title of Datuk Patinggi by the Sarawak Government in 1980.

Address: Residency, Kota Kinabalu, Sabah.

SARAWAK CHIEF MINISTER YAB DATUK PATINGGI TAN SRI (DR) HAJI ABDUL RAHMAN

DATUK PATINGGI TAN SRI (DR) HAJI ABDUL RAHMAN YA'KUB had one important thought on July 7, 1970 when he was sworn in as Sarawak's 3rd Chief Minister: to strive for political stability and peace, and get on with the job. of

developing Malaysia's largest state.

For ten years, he has not looked back and today, ander his leadership, Sarawak has become one of the best developed states in Malaysia. He has transformed a "problem" Sarawak into a stable, progressive state enjoying unprecedented peace.

Datuk Patinggi Rahman's greatest achievement is perhaps the skiliful handling and the successful conclusion of Operation Sri Aman in March, 1974 when 482 communist terrorists lay down their arms and returned to society.

.....

By any measure, in any country, it was a rare achievement.

The Chief Minister has also earned the credit for spearheading the formation of a state coalition government which became a model for the Malaysia National Front government. It was in 1970 that the first coalition government in Malaysia was formed in Sarawak. The success of Datuk Patinggi Rahman's government, which included an exopposition party, inspired the birth of Barisan Nasional government in 1974.

A brilliant planner and a getter for Sarawak's share of the nation's development cake, Datuk Patinggi Rahman has successfully wooed investors and the federal leaders to site some of Malaysia's biggest industrial projects in the State.

As much as \$6 billion is being poured into the LNG Plant, Kidurong Deepwater Port, ASEAN Urea Project and an aluminium smelter in Bintulu, creating tremendous social and economic impact and providing thousands of jobs for the Sarawak people.

Born on January 3, 1928 in Bintulu, Datuk Patinggi Rahman was an oil tester in Miri before becoming a Native Officer and Lay Magistrate from 1948 to 1958.

He furthered his studies at University of Southampton, School of Public International Law, The Hague, Holland and Lincoln's Inn and qualified with a B.A. Law (Hons.) degree.

On his return to Sarawak, he served as a Crown Counsel and Deputy Public Prosecutor for four years.

In 1963; he quit government service and joined politics. When Malaysia was formed, he was appointed Assistant Rural Development Minister. He became Assistant Minister for Rural Development and for Justice in 1964 before his prjomotion

as Federal Lands and Mines Minister in 1965. In 1969, he was given the key post of Federal Education Minister which he relinquished in 1970 in order to contest the Sarawak general elections.

He was Executive Secretary of the Sarawak Alliance in 1963 and was founder of Party BERJASA which later merged with Party Negara to became Parti Bumiputera.

He played an important role in the 1974 general election as the Executive Secretary of Malayan Alliance Election Committee.

A Member of Parliament for the last 18 years, how as Chairman of the National and International Qur'an Reading Competition from 1967 to 1970. Since 1969, he has been President of Angkatan Nadhatul Islam Bersatu (BINA) and since 1973, President of Sarawak's youth body, SABERKAS.

Awards: PNBS, 1967; BM (Indonesia). 1969; SPMJ, 1971; SIMP, 1972; SPDK, 1973; DP, 1974; SPMK, 1975; SSDK, 1977; PMN, 1977; Honorary Doctorate of Law (UKM), 1975; Honorary Doctorate of Science (UPM), 1975.

Address: Chief Minister's Office, Bangunan Tunku Abdul Rahman, Petra Jaya, Kuching.

MESSAGE BY SARAWAK MINISTER FOR AGRICULTURE AND COMMUNITY DEVELOPMENT

YB DATUK DR. WONG SOON KAI

1 FEEL greatly honoured to have been asked to write a message for this commemorative publication entitled "18 Years in Malaysia: 1963-1981".

It must be very exciting and challenging to attempt highlighting all the important historical events and personalities in Sarawak in the past 18 years after 'merdeka' through Malaysia. To many who have been one way or another personally involved during this period it holds even greater interest. Events in history, be they ancient or modern, could be highly educational in the sense that they would provide valuable lessons to guide future human endeavours. To be sure, the editor of this publication will certainly have a difficult task to sift the myriads of events and happenings, to separate the significant from the trival, to identify and lay emphasis on the main current which has influenced and carried changes and progress, and to avoid bias, prejudice and sycophancy. Undoubtedly, the period 1963-1981 represents

one of the most, if not the most important, era in the history of Sarawak. The march from a colony to part and parcel of an independent nation was by any standard a momentous event. The fact that it was achieved smoothly and painlessly without revolutionary upheaval and bloodshed as had been the rule rather than exception in so many countries throughout the world was by itself most remarkable. Nevertheless, 'merdeka' through Malaysia in 1963 was only the beginning of a long and arduous journey toward matured nationhood. This was

especially so for a complex multiracial society of Sarawak. By 1981, we have advanced quite a long way along this road, thanks to the leadership given by our leaders at the national, state and local levels. In the process, there had been for Sarawak people a great deal of political and socio-economic changes, development and advancement. The standard of living, the literacy rate, the level of education the national awareness and cohesiveness, and the aspirations of the people had gone up enormously. Meantime, political and socio-economic problems, rapid urban drift with its attendant ills, security threats, crime, drug, polarisation through politics, race, religion, social classes, etc. had not disappeared, but instead in some cases become even more acute. Thus the responsibilities of those who have been entrusted to govern the country, to tackle and solve these problems, and to lead the country towards a better future must have been onerous indeed. Their achievements or mistakes, strength or weakness, and success or failure can best be assessed and judged through the eye of history.

Even more exciting and challenging time will lie ahead of the present for this young country of ours. Nonetheless, the past 18 years had been so rich in events, personalities, changes, development progress, etc. that the editor of this publication should have no difficulty in gathering sufficient worthwhile and meanineful materials.

I wish him good judgement and success in his endeavour.

\$ O weene

DATUK DR WONG SOON KAI Minister for Agriculture & Community Development.

Sarawak

marches on

LEAVING 18 years of progress behind, Sarawak — the Land of the Hornbills — looks ahead to a brighter and more exciting era of growth.

Since achieving her independence by joining disabilities in 1963, Sarawak, the biggest State of dalaysia in 1963, Sarawak is biggest State of the nation, has seen more development than all the years preceding independence put together. The network of sealed roads has been increased from 1963's mere 297 miles to 1980's impressive 2,000 miles — an average of 100 miles completed annually.

As more roads are built, opening up the otherwise idle rural land, progress follows closely.

Despite handicaps in communications and the shortage of professionally and technically qualified personnel, the State has successfully completed 70% of the projects under the 3rd Malaysia Plan (1975-1980).

The fact that the State Government has asked for \$4,163 million for the 4th Malaysian Plan (almost twice the amount of \$2,536 million allocated under the TMP) and the recently presented biggest ever State budget of \$370 million for 1981 are reflective of the healthy, confident and optimistic state of our economy and future.

While timber, pepper, rubber and sago continue to be important major exports. Sarawak has now also become a net exporter of crude oil which brings in millions of dollars for the nation's coffers.

On the industrial front, Sarawak already boasts some remarkable achievements. Cement Manufacturers Sarawak (CMS), a joint venture project with neighbouring Sabah, produces sufficient, fine quality cement to meet the increasing need in the two booming East Malaysian states. Plans are in hand to build a \$140m clinker plant at Mambong in Kuching to produce the vital ingredient for coment.

Sarawak Motor Industries, set up in 1974, is showing healthy profits, moving from strength to strength in its assembly line of cars and trucks. In 1980, it began assemblying the prestigious BMW

Sarawak Timber Industry Development Corportion which was set up in 1973 has made meaningful contribution to the proper and efficient exploitation of the State's vast forests, which are an vital source of income. In 1979 alone, timber exports brought in a hefty \$1 billion.

Vast improvements have been made to the port facilities in Kuching, Sibu and Sarikei which handle the heavy eargo traffic, another indicator of Sarawak's growing economy.

The biggest achievement over the years must hovever go to the successful securing of a mindboggling \$6 billion investment money for Bintulu, a former sleepy fishing town.

Giant projects like the \$2.5b Liquefied Natural Plant, \$490m Kidujrong Deepwater Port, \$800m ASEAN Urea/Ammonia Plant and \$1.5b Aluminium Smelter will transform Bintulu into Malaysia's most heavily invested industrial area and put Sarawak on world investors' map.

The tremendous social and economic impact by these ambitious projects on the State is reflected by the fact that 15,000 jobs have been created and 4,000 permanent jobs will result when the schemes are completed in 1985. By 1995, an estimated \$20 billion will be invested, creating 18,000 permanent jobs. The economic benefit for the 1.5 mil population of Sarawak will be, by any standard, enormous.

Indeed, the land-rich and resourceful "Land of the Hornbills" is on the very threshold of a must exciting and promising era. It can be confidently predicted that soon. Sarawak will be among the foremost progressive states in Malaysia.

IMPORTANT POLITICAL EVENTS IN SARAWAK

June 12, 1959	- Sarawak United People's Party (SUPP) was formed, drawing its
, ma (a) 1707	support mainly from Chinese and Dayaks who were farmers and workers. Its leaders were Tan Sri Datuk Ong Kee Hui and Datuk Stephen Yong.
April 9, 1960	 Party Negara Sarawak (PANAS) led by Datu Bandar and Abang Othman was registered. It was essentially a native party with only 1% Chinese members.
April 10, 1961	 Sarawak National Party (SNAP) led by J.S. Tinker, Edward Howell, Lionell Bediman and Datuk Stephen Kalong Ningkan was formed, drawing support from Ibans in Second Division.
December 1961-	 Barisan Ra'ayat Jati Sarawak (BARJASA) was formed. Tun Datuk Tuanku Haji Bujang was Chairman.
February 1962	 Cobbold Commission of United Nations heard opinions of Sarawak people on entry to Malaysia. Verdict: one-third in favour, one-third wanted safeguards and one-third opposing.
July 1962	 Sarawak Chinese Association (SCA) was formed by wealthy business- men, mainly Kuching Teochews and Sibu Foochows. Datuk Ling Beng Siew was President.
July 1962	 Party Pesaka Anak Sarawak (PESAKA) was born. Its leaders: Tan Sri Datuk Patinggi Temenggong Jugah, Penghulu Masam. Tua Rumah Francis Bujang. Penghulu Francis Umpau. Pengarah Banyang. Penghulu Chundi and Jonathan Bangau. Support came mainly from Ibans of Third Division.
Oct 22, 1962	 Sarawak United Front (later Sarawak Alliance) was launched, comprising BARJASA, SNAP, PESAKA, PANAS and SCA.
Dec 8, 1962 Dec 12, 1962	 Rebellion, led by A.M. Azahari, broke out in Limbang. British and Gurkha troops quashed Tentera Nasional Kalimantan Utara (TNKU) rebellion and recaptured Limbang.
Dec 15, 1962 April 15, 1963	 Mass resignations of Iban members from SUPP. PANAS left Sarawak Alliance.
lune 24, 1963	 Sarawak held 24 District Council elections. Results: SUPP 115. Independents 117, PANAS 59, SNAP 48, BARJASA 44, PESAKA 43, SCA 3.
fuly 22, 1963	 Datuk Stephen Kalong Ningkan was appointed first Chief Minister in Alliance Government comprising PESAKA, BERJASA, SNAP and SCA.
iept 16, 1963 April 17, 1964	 Sarawak became independent by joining Malaysia. Party MACHINDA, a multi-racial group led by Michael Buma. Leong Ho Yuen and Yeo Cheng Ho, was formed. (Dissolved in April 1967)
May 1965	 Proposed Sarawak Land Bill to permit non-natives to purchase native land touched off Cabinet crisis. Chief Minister Datuk Ningkan expelled BARJASA from Alliance Government. Two BARJASA Ministers Datuk Amar Abdul Taib Mahmud and Awang Hipul Penguran Annu relinquished Cabinet posts. Bill way withdrawn.
une 1966	21 Council Negri Members of PESAKA, BARJASA and PANAS signed petition for Datuk Ningtan's resignation. The latter refused. Governor dismissed Datuk Ningkan as Chief Minister and appointed Datuk Penghulu Tawi 3li to the post. Datuk Ningkan filed suit in High
Sept 7, 1966	Court. High Court in Kuching ruled Datuk Ningkan's dismissal was unconstitutional. He was reinstated to Chief Minister's post.

Heralding an era of peace on Oct. 21, 1973 when Memorandum of Understanding between Sarawak Government and PARAKU was signed at Rest House of Bandar Sri Aman. Signatories: Ileft) Chief Minister Datuk Patinggi Tan Sri Abdul Rahman Ya'kub and Iright) Mr Bong Kee Chok.

Sept 15, 1966	- State of emergency was declared in Sarawak.
Sept 19, 1966	 Two amendments to Sarawak Constitution were passed in Parliament, giving Governor powers to convene Council Negri and dismiss the Chief Minister.
Sept 23, 1966	 Council Negri sat. No confidence motion was passed against Datuk Ningkan. Datuk Ningkan relinquished Chief Minister seat.
Sept 24, 1966	- Datuk Penghulu Tawi Sli was reinstated as Chief Minister.
May 15, 1969	First direct general elections were suspended, following racial disturbances in Peninsular Malaysia. Sarawak was ruled by State Operations Committee (5OC), headed by Federal Secretary.
May 1970	 BARJASA and PANAS merged to become Party Burniputera Sarawak (BUMIPUTERA), led by Datuk Patinggi Tan Sri Abdul Rahman Ya'kub.
July 5, 1970	- Sarawak held first direct general elections.
	Results for Council Negri: Bumiputera 12, SNAP 12, SUPP 12, PESAKA 8, SCA 3, Independent 1. Results for Parliament: SNAP 9,
	Parti Bumiputra 5, SUPP 5, SCA 2, PESAKA 2, Independent 1.
July 6, 1970	 Negotiations between two camps, SNAP-SUPP-PESAKA and BUMIPUTERA-SUPP were held to discuss formation of coalition government.
July 7, 1970	Bumiputera-SUPP and PESAKA formed Coalition Government. Datuk Patinggi Tan Sri Abdul Rahman Ya'kub was appointed 3rd Chief Missers.

Simanggang (now Bandar Sri Aman).

Oct 13, 1973

· Letter proposing peace negotiations from Bong Kee Chok, Director

and commissar of PARAKU (North Kalimantan People's Army) reached Chief Minister Datuk Rahman who was in hospital in

Chief Minister Datuk Rahman (left) announcing the return to society of 482 PARAKU members at Tun Rusak Hall, Kuching on March 4, 1974. On his left is Home Affairs Munster Tan Sri Ghazali Shafte. At extreme right is Iban Paramount Chief Temenggong Jugah.

an Urea/Ammonia

5. Universiti Pertanian Malaysia Sarawak Campus (\$400 mil)

IT is estimated that by 1995, an astronomical \$20 bit worth of investment money will have poured into Bintulu which by any standard is already the beaviest invested spot in the whole of Malaysia. Such gigantic in-flow of capital money is creating a tremendous impact on the socio-economic and financial scene not only in Sarawak but also throughout the nation.

\$6 bil worth of development projects are taking shape in the once quiet little coastal Bintulu, creating about 15,000 jobs. When these giant projects are completed, there would be permanent iobs for 4,000 people. By 1995, some 18,000 permanent jobs will have been created bringing immense benefit to Sarawak in terms of job-creation.

\$2.5B LNG PLANT

Work on the \$2.5 bil LNG Plant which will be the world's biggest of its type is progressing A joint venture project between Malaysia's national oil company, Petronas, Japan's Musubishi and Shell International, the LNG plant

World's largest dredger, the "New Amsterdam" at work in Kidurong to dredge a 5-mile approach channel for Kidurong Deepwater Port. The dredging contract, worth \$97 million, was awarded to Penta Ocean and Ballast Nedam. The job is expected to take 35 months. The "New Amsterdam" can dig up to 75 feet deep.

An aerial view of the sprawling site of LNG Plant. Work is in full swing,

is scheduled for operation in 1983 and thus becoming the largest single project to be completed in the shortest possible time.

Ten fields of recoverable natural gas reserve. estimated at several billion tons, have been discovered and are expected to last for many years. From the fields' wellheads, gas flows through about 80 miles submarine pipes into the LNG Plant at Kidurong. After liquefaction, the gas will be loaded into specially-built LNG carriers of 130 thousand cubic metre capacity each for markets in the Far East.

The first LNG Carrier is expected to leave the specially designed basin of the deepwater Kidurong Port, fully loaded, on January 1, 1983.

\$800M ASEAN UREA PLANT

In October 1980, an agreement was sealed to build an Ascan Urea Plant in Kidurong between Malaysia (60%), Thailand, Philippines & Indonesia (13% each) and Singapore (1%). The plant will have a capacity of producing 1,000 tons of ammonia and 1,500 tons of urea per day and is scheduled for operation by 1984.

Costing about \$800 mil, it will be able to meet Malaysia' need for liquid ammonia and exports surplus to other Asean partners.

\$1.5B ALUMINIUM SMELTER

When the \$1.5 bil aluminium smelting plant

which is undertaken by Reynolds International comes into being. Bintulu's industrial boom will be further accelerated. 400 acres have been set aside for the project which will have an annual production of 150,000 to 200,000 tons. Alumina will be imported and the finished products are for export.

INFRASTRUCTURE SERVICES

The Sarawak Government will spend, until 1995, about \$325 mil on infrastructure services. water works, electricity, sewage, drainage, road and other facilities in the expanding Kidurong industrial ZORC

PELAGUS HYDRO POWER SCHEME

Urgent attention is being given to the development of the 1,700/- megawatt Pelagus hydro power project in the 7th Division. Feasibility studies are underway and the project is expected to come on stream by 1990. The huge hydro power scheme, expected to cost \$4 bil, will be able to supply energy to the whole of Malaysia and even Singapore, including all the industrial projects in Kidurong,

In the meantime, the Sarawak Electricity Supply Corporation has extended the capacity of the existing power station in Bintulu from 1.8MW to 3.8MW. A new power station of 8MW has been erected which is sufficient to meet the demand till the end of 1981.

No: 54926, 57813 Plans are in hand to build a \$40 mil, 60MW power station. Subsequently, the LNG Plant, Kindurong Deepwater Port and ASEAN Urea Plant would all have their own power stations.

ROAD BUILDING

59.5 mil was allocated under TMP for construction and bitumen-surfacing of about 10 miles of truck road off Mile 3 Binutu/Mir Road leading to Tg. Kidurong. 528 million has been set aside for upgrading 18 miles of Miri/Bintiun Road and bitumen surfacing of the Miri/Suai and Bintulu/Suai Road.

About 28 miles of road from Sibu and 13 miles from Bintulu of the Sibu/Bintulu truck road have been completed and by 1983, the missing link of 42 miles is expected to be completed. A sum of \$27 mil was allocated for this purpose.

Plans have also been approved for building the 80 miles long Miri/Bintulu/Labang/Tubau/Belaga truck road.

WATER SUPPY

To meet the increased water requirements generated by the mushrooming industries and the growing population. the Sarawak Government has allocated \$30 mil, until 1982, to improve and expand water supply systems in Sintulu. There will be new treatment plants, reservoirs and dams to ensure a continuous supply of water.

NEW AIRPORT

Feasibility studies on an international Bintulu Airport which will be able to take in Airbuses have been completed. It will be sited across Kemena River. 12 miles south of Bintulu.

When the new airport is completed in 1985, the existing airstrip, behind the Bintulu Town, will be converted into a public park. A town hall and a public library will also be built there.

NEW HOSPITAL

The BDA has also earmarked 300 acres in Bintulu for a new regional hospital to serve the northern part of Sarawak, which may later become a teaching hospital.

Also included in the plans is the construction of a polyclinic in Kidurong.

About \$1.8 mil has been spent to improve the present Bintulu Hospital as well as build the Bintulu Nurse's Hostel and Ng. Tatau Klinik Desa. 64 beds have been added to the existing 100 at the Bintulu Hospital.

VOCATIONAL SCHOOL

Tenders were opened in April 1980 for the construction of a vocational school in Bintulu with a capacity intake of 500. The school is expected to be ready by 1982.

In addition to the existing six primary schools and one Secondary school, Bintulu will have, under FMP, a new 12-classroom primary school and a new

Part of the several hundred pre-fab houses for construction workers in Kidurong Industrial Area.

The Bintidu Crude Oil Terminal (BCOT) on a hill. It was completed in 1979.

24-classroom secondary school. Four existing primary schools will be extended.

PETRONAS MOVES IN

Malaysia's national oil company, Petronas, however in solve the fuel supply problem in the fast growing industrial town. Temporary skid tanks and retail service hit the street in August 1980 and two sites have been chosen for permanent Petronas bulking stations. One is near the Kemena Crossing and the other is at Kidurong.

POLICE FORCE BEEFED UP

Under EMP, a Police Field Force will be stattoned in Bintulu. One police inspector and 24 new recruits have already been sent to beef up the original 50-men police team. There are now one Superintendent, two ASP, five Inspectors, three Surgerints, five Corporals, 54 Constables and three Auxilhury constables to maintain law and order in the town.

STONE SUPPLIES

Three stone quarries will begin operation soon to supply the essential building materials for the numerous construction projects in and around Bintulu. Now, stones are being transported mainly from Kuching. Of the 3 quarries, one will be used by Public Wurks Department exclusively while the

other two by Kidurong Deepwater Port Authority and BDA respectively.

HOUSING SCHEMES

2,000 units of low cost houses will be developed an estimated \$60 mil for the 800-acre Kidurong Residential Zone and Tg. Batu area. 400 units are expected to be ready in June. 1981.

520 houses will be constructed for the LNG project personnel, 400 for the Asean Urea Plant staff and 74 for the Kidurong Deepwater Port employees.

The BDA is also building 68 staff quarters at an estimated cost of \$10 mil.

In addition of the conventional housing, prefab houses are built by project contractors for their increasing construction workers.

Each residential area is planned to accommodate 25,000 people by 1995.

LIGHT INDUSTRIAL AREA

Three light industrial sites covering 569 acres will be developed into lots and sold to private entrepreneurs. Costing about \$40 mil, the project, classified under Bintulu Service, Kidurong Service and Kemena Crossing Industrial Estates, will add to the economic boom and create considerable job opportunities.

WHILE rapidly changing the landscape of Bintulu, the various giant development projects are posing a tremendous challenge to the twoyear-old BDA.

Clearly, the BDA is coping very well with its enormous tasks of planning and co-ordinating activities in its jurisdiction and there are optimistic signs that the major projects will be completed as scheduled.

It is a safe bet that in five to ten years' time, Kidurong will become one of Malaysia's most important economic centres, generating thousands of jobs and bringing in millions of foreign exchange dollars.

For BDA, the job has just begun.

SEDC moves ahead

SARAWAK ECONOMIC DEVELOPMENT CORPORATION (SEDC)

Date Established: March 1, 1972

Main Objectives:

- To stimulate commercial and industrial growth
- To provide infrastructure and facilities for commercial and industrial development
 To encourage and promote active Bumiputra
- To encourage and promote active Bumiputra participation in commerce and industry under the New Economic Policy

SINCE its inception nine years ago, SEDC—
Sarawak Government's investment arm — has
made significant contribution to the State's social
and economic development. It has taken an active
part in the commercial and industrial development
by setting up trading companies, factories and
going into joint ventures with local and foreign
investors.

SEDC's role goes far beyond creating jobs. It initiated projects which would bring economic benefits and stimulate participation by the private sector. Most importantly, SEDC has taken the lead to guide Bumiputras to venture into the business world by providing opportunities and facilities. Some of its shares have been sold to Bumiputras. This is a clear example of the State Government's efforts to meet the 30%-Bumiputra-share target under the NEP

Apart from operating 4 trading companies, 2 service industries and 6 manufacturing industries. SEDC also develops and manages 4 industrial estates covering 1,700 acres. Its total investment amounts to more than \$61 million.

Entrusted with theresponsibility of overall coordination, planning and development of industrial estates in Sarawak, SEDC's job is by no means easy. The State Industrial Co-ordination Committee approved 28 industrial projects from January to May. 1979 and half of these were allocated sites at the Pending Industrial Estate in Kuching, Suitable sites for two other projects which include shipbuilding, metal works, chemicals, food manufacturing and wood-based industries will be allocated in Upper Lanang, Sibu and Piasau, Miri.

SEDC's active participation in commerce and industry has an effect of triggering off other inter-

Skilled hands at work at Sarawak Motor Industries assembly plant in Pending, Kuching.

related and inter-dependent industries. Directly, SEDC has created about 1,400 jobs in its various subsidiaries and associate companies.

One significant fact is that SEDC shares in these venture are shares-in-trust for Bumiputras.

Far from being complacent, the Corporation is continously looking for viable projects and new profit centres. With the State's political stability and abundant natural resources, more industries are expected to be set up. The role of SEDC will, in the years ahead, become increasingly important in the country's social and economic development.

SOME OF SEDC'S PROJECTS

Cement Manufacturers Sarawak Sdn Bhd (CMS)

À joint venture (50:50) with Sabah Economic Development Corporation (SEDCO), the \$40 mil plant started operation in early 1978. It can produce up to 1,500 tons of cement a day. About 70% of its products is sold in Sarawak while the rest goes to Sabah. Raw materials like clinker and gysium are at present imported from Japan and Korea. Plans are in hand to start a clinker plant utilising local limestone and coal. CMS also is expanding its sales into neighbouring Brunei.

Sarawak Motor Industries (SMI)

When first started in 1974 SMI could only assemble 4 vehicles a day. It now has the capacity of producing 22 vehicles a day and the makes include BMW. Hino, Toyota and Mitsubishi passenger cars and commercial trucks. Hino (M) 5dn Bhd, Sarin Motors 5dn Bhd, Motor & Carriage Industries and BMW Concessionaries (M) 5dn Bhd are doing the marketing. SEDC's share holding in the companies is 70%, 70%, 60% and 60% respectively. The joint venture partners are Hino & Toyo Menka, Incheape, Cycle & Cariage and Continental Motors (M) 5dn Bhd.

In 1978, SMI assembled 2,200 vehicles, a 100% increase over 1977's production. Sales turnover for 1979 was a respectable \$100m.

Besides assembling vehicles, SMI also sells Mitsubshi Canter trucks and Rosa Mini buses. Plans are in hand to assemble motorcycles of European make.

3. Holiday lnn

A joint venture (51:49) with Inchcape Sarawak 5dn Bhd, the \$16m, 165-room international standard hotel started operation in May 1976. It has become a prominent landmark in the State Capital while business has picked up from 1977's 43% to 1979's 70% occupancy.

4. Sebor (Sarawak) Sdn Bhd

A joint venture between SEDC together with Buniputras and Incheape (51:49), the company markets a number of well known product lines like Nestle, Lever Brothers, ICI and Guinness. With 8,000 distributive outlets throughout Sarawak, it has made steady progress over the past years,

5. Eksport Utama Sdn Bhd

It buys and exports black and white pepper to Singapore. Efforts are made to sell direct to European buyers. Major shareholding is held by SEDC and Bumiputras.

6. Sabah Flour & Feed Mills Sdn Bhd (SFFM)

SEDC and SEDCO each holds 48% equity in the joint venture \$33m project which is sited on a 10-acre land at Rancha Rancha Industrial Estate in Labuan. Pald-up capital of the company which was established in 1972 is \$12.3 million and production began in June, 1979. Mainly to meet Sabah, Sarawak's flour and animal feed needs, the plant can produce up to 72,000 tons annually.

7. Sarawak Chemical Industries Sdn Bbd

SEDC has 22.2% in the company, formed with local businessmen. Located in Sibu, it exports ago flour to Japan. About \$2 mil worth of product was exported annually in the past three years.

8. Hume Industries (Sarawak) Sdn Bhd

It manufactures prestressed concrete products and reinforced concrete pipes. With the rapid industrial growth in Sarawak, the company's products will be increasingly in demand. SEDC and Hume Industries (Malaysia) Bhd's shareholding: 40-60.

9. Industrial Estate Development

More than \$77m will be spent on development of industrial estates in Sarawak under the 4th Malaysian Plan. They include Petra Jaya, Kuching (440 acres) Upper Lanang. Sibu (260 acres), Piasau, Miri (150 acres), Sarikei (14 acres), Simanggang (11 acres) and Betong (5.5 acres).

At present, the biggest industrial estate managed by SEDC is in Pending, Kuching, covering 1,200 acres.

10. Building Industry

SEDC has constructed the following: 49 readybuilt factory buildings in Pending and 9 shophouses in Bintulu, Liabang and in Kuching. It has plans to build: 2,800 residential houses for Pending Industrial Estate and Upper Lannag Industrial Estate as well as 75 shophouses in Kuching and Sibu.

11. Clinker Plant

SEDC and SEDCO have formed Sarawak Clinker Sdn Bhd to build and manage a \$140 million clinker manufacturing plant at Mambong, Io miles from Kuching. Feasibility studies by SEDC and Holderbank Management & Consulting Limited of Switzerland have been completed and a foreign technical partner may be invited to join the project.

Local limestone, sandstone and shale will be ultilised to produce clinker for Cement Manufacturers Sarawak Sdn Bhd.

The setting up of the 1,300-tons-per-day capacity clinker plant will ensure a steady supply of the vital material, save thousands of dollars in import bills and generate imployment opportunities.

It is expected to be operational by 1984.

The huge Cement Manufacturer of Sarawak plant in Pending, Kuching.

Sabah Flour & Feed Mills at Labuan, Sabah.

SALCRA scores successes

SARAWAK LAND CONSOLIDATION AND REHABILITATION AUTHORITY (SALCRA)

Date Established: May 1, 1976

Main Functions:

* To rehabilitate/develop land for agriculture

To promote and undertake agricultural projects
 To plan and undertake development of land declared to be a development area

ALTHOUGH Sarawak is blessed with the abundance of land, land issue has always been a sensitive topic, especially regarding the vast areas of native customary land.

Under the mid-term review of the 2nd Malaysia Plan, the State Government decided to set up SALCRA with the chief aim of developing and managing customary land, using in-situ development concept.

The first land scheme was started in Lubok Antu in the Second Division and in a relatively short time, SALCRA has earned the respect of the rural land owners and won praise from many quarters for its efficiency and fainness.

SALCRA's activities are confined to only three types of land:

- (1) Unalienated State land (including any native customary land)
- (2) Land owned by or vested in SALCRA and
- (3) Land whose owners have requested SALCRA

to develop.

In its efforts to eradicate rural poverty, SALCRA, among other things, raises the productivity of customary land and reduces shifting cultivation in the land. Rural leadership from amongst dwellers is encouraged and social amenities like medical facilities are provided.

SALCRA utimately aims to develope communities within the context of the national development plan by improving existing ones or creating new villages in chosen localities.

The most significant aspect of SALCRA's schemes is that tand is developed without depriving owners of their legal rights. However, during the development period, such rights are "suspended" and the land is charged to SALCRA which has the exclusive right to develop and manage it.

When all development costs have been recovered, SALCRA will give the title back to the owner as soon as it thinks it fit to leave him to manage his land under SALCRA's supervision.

The crops planted in SALCRA schemes include oil palm, cocoa and rubber. The oil palm schemes at Merindun and Matang Ai have raised the average monthly income of a family from \$50 to \$150.

There is little doubt that SALCRA's participation in land development will go a long way in utilising the otherwise wasted land and uplifting the living standard of the rural people.

One of the many oil palm schemes started and developed by SALCRA.

Scheme participants become proud owners of new houses financed by Sarawak Housing & Development Commission, Above was the old dilipalated longhouse and below is the new house under construction.

STIDC plans for future

SARAWAK TIMBER INDUSTRY DEVELOPMENT CORPORATION (STIDC)

Date Established: June. 1973

Main Objectives:

- To develop new policies for active promotion and development of timber industry including local and overseas marketing
- To develop economical and beneficial felling and ultilisation of forest resources
 To convers fair and southable sharing of timber
- To ensure fair and equitable sharing of timber wealth

THERE is no denying of the importance of Sarawak's timber industry to the country's social and economic development. Immense foreign exchange has been earned and thousands of jobs have been created.

77% or 23.5 million acres of the State's total area is covered by forests, 12% is swamp forests and 65%, hill forests. In 1979 alone, timber exports brought in a hefty M\$999 mil to the State. By 1977, about 48,000 people were employed in the timber industry.

Over 90% of logs, sawn timber and timber products are exported. Japan, Taiwan, South Korea, Hong Kong and Singapore are the major importers of logs. The EEC countries, particularly West Germany, U.K., Italy, Holland and U.S.A. buy Sarawak's sawn timber, especially Ramin. They also import dowels, mouldings and plywood. All the woodchip products are sold to Japan.

In order to evaluate the forest potentials and formulate policies for this vital economic vein, the Sarawak Forestry Department together with United Nations' Food and Agriculture Organisation (FAO) carried out a comprehensive forest inventory project from 1969-1972. Three million acres were covered. Estimated net timber resource: 100 MILLION TONS.

The eight unit areas covered by the FAO inventory could support up to twelve wood processing plants, each with 150,000 to 300,000-acce concession.

On the recommendation of FAO, Sarawak Timber Industry Development Corporation was formed. Since its inception, STIDC has been actively pursuing a policy of gradually reducings log exports while expanding wood-based industries.

It is significant to note that since late 1940's, swamps logging has been the main stay of Sarawak's forest industry. Most logging activities are labour intensive and crude and unsophiscated equipments

are used. Intensive felling of swamp logs, especially Remin, will result in the decline of Ramin significantly. STIDC thus is placing emphasis on hill timber development.

Licences for 11 industrial units of 150,000 to 300,000 acres have been issued. They comprise 7 FAO Inventory Units and are expected to produce 120,000 to 240,000 tons of commercial timber annually based on a 25-year harvesting period.

Five licenses were issued to STIDC, with a total area of 1,104,540 acres. They are operated by Malaysian joint-venture companies which pay a premium of \$6 per ton to STIDC. The licences will be transferred to the companies when the latter fulfill STIDC's requirements regarding timber processing facilities and effective Bumiputra participation.

265,084 has been given to Universiti Pertanian Malaysia (UPM) for establishing a campus in Bintulia. It is operated by a joint-venture between UPM (51%), Arab investment for Asia (Kuwait) (40%) and STIDC (9%) for its funds, UPM will get a premium of \$6 per ton from the timber company.

A joint-venture company between Sarawak Foundation and Malaysians was given 215, 720 acres. The Foundation is paid a premium from timber produced for its funds to run its various social and educational projects.

Five other industrial units have been licensed direct to Malaysian companies and Malaysian/ foreigner joint-venture companies. They cover 1,032, 929 acres.

In its efforts to reduce log exports and stimulate wood-based industries, STIDC limits log exports of major hill forest concessions to 34% of the annual harvest, 40% for sawmills and 20% for veneer/ plywood mills.

A Timber Development Fund, aimed at assisting Bumiputras, will be set up. Bumiputras have been recruited to work in timber concessions and are given the necessary training so that they will be able to play a significant role in the State's timber industry. Plans are also in the pipeline to set up a logging school and a quality control unit.

In its long term strategy, STIDC aims to make Sarawak not only as a reliable timber supplier but also a country which produces high quality timber. With STIDC's active participation and skillful planning, there is no doubt that Sarawak's rich forests will continue to provide the country with a steady source of income for a very long time.

Draft - 25 ft.

An aerial view of Datuk Amar Sim Kheng Hong Wharf (Pending Point).

Wharf labourers loading cargo onto a big ocean liner at Pending Port.

ALTHOUGH handicapped by its riverine location 21 miles from South China Sea, Tanah Puteh and Pending Ports have served Sarawak's cargo

traffic well. It is also a reflection of the State's booming economy that total imports and exports through these two ports rose from 1963's 245,000

tons to 1978's 669,000 tons, a 173% increase. The humber of ships handled is almost doubled, from 1963's 459 to 1978's 803.

Before 1961, port facilities in the State Capital were operated by private shipping companies but as the cargo traffic grew, these facilities were no longer adequate. The Port Authorities Ordinance

was enacted in 1961. Tanah Puteh Port was built and began operation under the Kuching Port Authority.

The expanding economy soon pushed Tanah Putch Port beyond its handling capacities and in 1975, Pending Port was born. While the former

has an optimum capacity of 300,000 tons a year, the latter's like capacity is 350,000 tons a year. Pending Port however has been designed to handle pallestised cargoes and equiped to handle 20-foot 150 containers.

With more pallestisation and containerisation in the present world shipping trade, the combined handling capacity of the two ports is well beyond

650,000 tons a year. With the steady growth of the State's economy, it is estimated that in a decade's time, cargoes going through Tanah Putch and Pending Ports will exceed 1,200,000 tons.

Preparing to meet the future demands, the Kuching Port Authority is currently carrying out site reclamation, expansion of open storage space

and the construction of a back-up shed of approximately 80,000 sq. ft. at Pending Port. Plans are also in hand to build additional berths with a supporting transit shed.

Busy days ahead

Ocean inters berthing alongside Rajang Port Authority wharf in Sibu.

RAJANG PORT AUTHORITY (RPA)

Date Established: 31 October, 1970

Jurisdiction: Sibu, Sarikei, Binatang, Sg. Merah and Tg. Mani

Sibu Port Facilities

Length: 976 ft.

Apron: 60 ft. Depth: 30 ft. at lowest water

Capacity: 12,500 dwt vessels

Storage Space:

2 Transit Sheds - 75,000 sq. ft. 1 Dangerous Goods Store

- 5,600 sq. ft.

Open Yard: 119,000 sq. ft.

THE establishment of the Rajang Port Authority in 1970 brought under control and thus effective management to the wharves and facilities in Sibu, Sarikei, Binatang, Sg. Merah and Tg. Mani along Sarawak's longest river, Batang Rajang. Prior to the coming being of RPA, the ports were run and maintained by three government departments namely Public Works, Marine and Royal Customs and Excise Departments. Stevedoring and handling of cargo were entirely left to the private sector. Furthermore, the capacity of the old Sibu Port was exceeded as far back as 1963. As a result there were serious congestions and delays.

Sibu Port Expansion Project was launched two years after RPA was set up and by May, 1977, the \$32 million job was successfully completed. Port length was increased from 486 ft. to 976 ft. and its optimum capacity was raised from 175,000 to 450,000 tons per year. Palletising cargo handling and containerisation facilities were added and the nightmare of port congestion had totally disappeared.

The improved port facilities and efficient management of RPA have no doubt brought tremendous economic benefits to the Third Division which is generally regarded as Sarawak's richest district and which exports most of the State's timber.

The fact that Sibu is Sarawak's busiest town. being the collecting and distributing centre for the numerous towns and villages along the Rajang River, underlines the importance of RPA. In 1977, Sibu Port handled 258,704 tons or 88% of cargo out of the total of 292,161 tons going through Sibu, Sariket, Binatang Ports. In all RPA handled 1.280,519 tons of cargo in 1977, 879, 811 or 69% went through Tg. Mani.

In 1977, timber and timber products form 89% of the exports, followed by sago, bulk fuel oil and pepper/rubber. Other export items include illipenut and petroleum products. Consumers' goods including rice, bulk fuel oil and building materials are the main import items.

The increase in cargo tonnage since RPA was established has been quite steady. In 1972, the figure was 1.080,062 and in 1976 1,342,280 tons of cargo was handled.

At the accelerated rate of development in Sarawak and the central location of RPA's ports. especially Sibu, it can be predicted that the importance of RPA will be more felt in the crucial years ahead.

Giant hydro-power schemes

SEVERAL ambitions and giant power projects in Sarawak are likely to change the picture of energy supply in the State as well as the whole of Malaysia in the next one or two decades.

About 106,000 people in Sarawak's rural areas will directly benefit from the already approved schemes under the 4th Malaysia Plan, which will cost the Government a total of 5967 mil.

Heading the list is the mammoth Batang Al hydro electricity plant in the 2nd Division which will cost a cool 5700 mil. The second and final phase of detailed engineering and design works are in progress and the project is expected to be cimmissioned in 1985. When completed, the 92-megawatt plant will be able to meet the power needs of the 1st and 2nd Divisions.

In fact, the Batang Ai hydro project has the least capacity among the 12 major hydro schemes which had been identified for feasibility studies in Sarawak.

The largest is the Pelagus hydro power project near Kapit in the 7th Division. \$4 billion will be required for the 1,700-megawatt scheme which, when completed, will be able to supply energy to the whole of Malaysia and even Singapore. Feasibility studies on the project involve the determination of the scheme's economic viability and a study on the high voltage direct current (HVDC) transmission from Sarawak to Peninsular Malaysia.

If all went well, the project which will be Malaysia's biggest such scheme would be launched by the end of FMP in 1985.

The other 10 major hydro projects are at Balui (2,803 MW), Bazam (1,070 MW), Murum (970 MW), Baleh (880 MW), Turoh (470 MW), Linau (380 MW), Belaga (320 MW), Limbang (230 MW), Katibas (190 MW), Except Limbang, the other 9 schemes are in the upper reaches of Sarawak's longest river, Batang Rejang,

In the boom town Bintulu where some of the country's biggest industrial projects are sited, a \$40 mil 60-megawatt power station will be built. The major industrial projects sited in the area

such as the liquefied natural gas (LNG) project, the deepwater Tanjung Kidurong port and the urea plant would have their own power stations.

An interesting development in the massive Pelagus hydro plan is that the Sarawak Government is seeking the co-operation of the Sabah Government to jointly develop the project. If an agreement is reached, a transmission cable will be laid from Sarawak to Sabah. Otherwise Sarawak will offer

The Pelagus Rapids above Kapit, Sarawak's 7th Division, which are potentials for Malaysia's biggest hydro-power scheme.

to sell its power from Pelagus to Sabah as well as transmitting it to Peninsular Malaysia through Johore

The Sarawak Government is also looking into the possibility of building two smaller power stations - one at the Pelagus Rapids and the other at the Balui River, both of Rajang River - instead of a single power plant and dam 20 miles above Kapit on the rapids.

One large power station would flood an area at least 100 miles long from above Kapit to Belaga and would swamp the junction of the Rajang and the Balui, losing the enormous potential that could be derived from the Balui River.

A West German consultancy firm's preliminary study shows that Balui alone can produce at least 3,000 megawatt, enough to supply energy to all Sarawak and Sabah plus all their industrial projects as well as feeding enough power into Peninsular Malaysia and Singapore grids to keep them going.

Under the FMP, 10 mini-hydro schemes would be developed to supply power to remote kampongs in Sarawak.

71,000 people have benefited from the Government's rural electrification programme under TMP, compared with only 5,600 people under SMP.

Of the 42 rural power stations targetted under TMP, 25 (60%) had been completed at a cost of \$200,000 each while the other 17 are expected to be operational in the middle of 1981.

TIMBERMINE TIMOR SDX. BHD.

31, (First Floor), Jalan Jawa, P.O. Box 2431, Kuching, Sarawak, Malaysia.

Tel: 50225 / 50324 / 55472 Telex: TIMINE MA 70093

Truck road ready by 1983

The parily completed \$1.0 million suspension bridge at Batang Lawas. When opened by the end of 1981, the bridge will provide a main road link between Lawas in Sarawak and Merapok of Sabah,

BY the end of 1983, motorists would be able to drive from Brunei through Miri, Bintulu, Sibu, Sarikei, Bandar Sri Aman onto Kuching and Westward to Semantan.

Work is now in full progress to complete the last 36 miles of a major trunk road linking Sibu and Bintulu. The existing trunk roads are from Kuching through Bandar Sri Aman, Sarikei to Sibu and from Bandar Seri Begawan through Seria, Kuala Belait, Miri to Bintulu.

Three construction units are at work from both of the 76-mile links, one at Ulu Balingan at Sibu end, one is moving in from Bintulu and the third is deep in Ulu Tatau.

All major road work on the link between Sarawak and Sabah had been completed. When two more bridges between Sarawak's Lawas and Sabah's

Merapok are finished by the end of 1981, the two East Malaysian States will be linked by trunk road. In all, there are five bridges along the 12-mile section: three have been completed but are temporary structures.

At the moment, the only method of travel between Lawas and Sabah is by speedboat through Merapok. A feasibility study on a 147-mile road link between Miri and Limbang skirting the border with Brunei has been completed and construction work is expected to start in 1981 under the 4th Malaysia Plan. The road will begin from Beluru, push through the ulu to Tanjung Tinjar and bypass Marudi.

From Tanjung Tinjar, it will reach Long Lama and then cut directly up to Nanga Medamit and join the existing road between Ukong and Kubong into Limbang.

A number of feeder roads will be built from the 147-mile main road, linking kampungs and settlements in the ulu.

Progress in road construction in Sarawak has been tremendous in the past 22 years.

In 1958, there were only 81 miles of main roads and a few small rural roads. 297 miles of roads were added between 1958 and 1965.

Under the 1st Malaysia Plan, 474 miles of road were completed. Another 483 miles were finished between 1971 and 1975.

When the planned 700 miles were completed in 1980 under the 3rd Malaysia Plan, there would be more than 2,000 miles of road throughout Sarawak. Costing \$270m, the 700 miles consumped 90% of Public Works Department's budget of \$300m.

8,000 cheap houses for Sarawak-

KUCHING, June 80:

8,000 low cost houses will be built in Sarawak under the 4th Malaysia Plan, costing about \$100 million.

The houses will be sited in 20 separate locatities throughout the State.

Under the 3rd Malaysia Plan, \$74m was given by the Federal Government for building 5,000 cheap houses.

The Sarawak Housing and Development Commission which is responsible for the construction completed 1,500 units by June, 1980. These include 800 brick and concrete houses at Batu Kawa, five miles from Kuching and part of the second phase of the 2,000-unit Kg. Malaysia Java project.

In Bintulu, a \$15m low cost housing scheme is being implemented. When completed, it will provide about 500 cheap houses to ease the boom town's accommodation problem.

A low cost housing scheme has also been planned for mile 10 at Kuching/Serian Road.

Villages for Civil Servants

KUCHING, June 80:

Villages will be built throughout the State for civil servants, which will be sold to them at subsidised rates.

This is part of the Government's efforts to overcome the accommodation problems faced by its officers.

A pet project of the State Secretary Datuk Amar Abang Haji Yusuf Putch, it will probably enable civil servants to buy houses with interestfree loans.

A Cabinet review in July allows Government officers to apply for two housing loans, the second being for renovation to an existing house or for purchase of a second home after the officer sells his first house.

Loans rang from \$10,000 to \$200,000 and repayment period is extended up to 25 years. For those who retire, they can continue the repayment for 10 years.

Plans to set up a Government Officers'

Children's Education Fund have also been finalised
and are awaiting Cabinet blessings. Under the
Fund. officers' children can obtain loans,
scholarships for pursuing degree or diploma courses
at local or overseas universities.

\$108m to assist Sarawak farmers

KUCHING, July 80:

An impressive \$108 mil will be spent under the 4th Malaysia Plan to improve and expand Sarawak's drainage and irrigation services. This is a 3½fold increase over the amount spent under the 3rd Malaysia plan.

A number of areas including 22,000 acres for double cropping of padi will be brought under suitable crop cultivation. The padi areas will include 6,000 acres in lower Samarahan, 2,000 acres in Limbang Valley and 1,270 acres in Sadong Krang.

Under the TMP, \$32 mil was spent on drainage and irrigation, which included services to 14,000 acres of padi and coconut land and 3,000 acres for padi doubte cropping. Eleven projects including Phase 3 of the 44,800 acres in Nonok Peninsular will be undertaken under FMP.

Measures including the planting of short-term rice like "Fis Tasrwak" and "Mashuri" which can yield 500 to 600 gantangs per acre have been taken to boost rice production. In addition, nine rice caperris from Taiwan have been engaged to conduct experiments and find efficient methods of rice cultivation. They are working in Tg. Purun, Lundu.

Efforts have been made to get more bumiputras to go into pepper growing while subsidy for pepper farmers in the form of fertilizers, pepper posts and planting materials have been increased.

A sago processing mill was set up in 5hu by a joint vecture company between SEDC and local investors. Plans are in hand to build more such mills in sago producing areas to improve the quality of the produce. A British specialist has been engaged to find new users for sago in the sago starch research station to be set up in Mukah.

Transforming the farming society

KUCHING, July 80:

The Sarawak Government launched the \$40m National Extension Project (NEP) which aims to bring about substantial changes in farming patterns and thus raise agricultural productivity in the state.

Included in the passive plans are the establishment of an agriculture institute, a regional training and development centre, ten extension subceutres and fifteen area forward bases.

To meet the additional task, the Agriculture Department will employ 248 more staff who will be given training locally and overseas.

There is high hope that with the completion

Kampongs get \$6mil drainage systems

SARATOK, Sept. 80:

Two drainage and irrigation schemes, costing \$6 mil will be implemented in Kaba-Kali and Kupang-Entebu padi plantations in Kalaka in 1981.

A sago subsidy in the amount of \$600 per acre

will be given for old plantations.

A generator costing \$38,000 will be provided for Kg. Kaba while a 540-ft belian bridge has been completed at Kg. Hilir.

Sarawak gets more schools

KUCHING, Oct. 80:

By the end of the 4th Malaysia Plan, Sarawak will have in all eight vocational schools.

To be added to the existing vocational schools in Kuching. Sibu and Miri will be four more technical institutes in Kuching, Limbang, Sarikei, Kapit and Bintulu.

Ten secondary schools currently under construction will be completed before 1985 while eleven more have been planned for FMP. They include two science and a religions secondary schools.

The two science secondary schools, the first of its kind in Sarawak, will be built in Miri and Kuching or Kabong in the Second Division.

Another 31 primary schools will be built throughout the State while 502 existing ones will either have new buildings or be expanded.

New homes for longhouse dwellers

KUCHING, Oct. 80:

The Housing and Development Commission will build longhouses for another 400 families under the 4th Malaysia Plan.

Five longhouses including the 30-door Merical Longhouse in Kapit had been completed recently to replace dilapidated ones in the 1st, 2nd and 7th Divisions.

A 22-door Bara Longhouse project costing \$226,000 and a 17-door Samuah Longhouse project costing \$237,000 were commissioned this month.

Six longhouse now under construction in the 3rd, 4th, 6th and 7th Divisions are expected to be completed early 1981.

Aid from the Government comes in the form of housing loans with a low interest rate of 51/2 % and repayment period of 15 to 20 years. Monthly instalments range from \$70 to \$90.

Second wildlife sanctuary

KUCHING, Nov 80:

455,900 acres at Lanjak Entimau in the 1st Division have been set aside for developing into a wildlife sanctuary. This is in addition to the existing one at Samunsan, also in the 1st Division.

Efforts have been intensified to prevent the shooting of the protected Rhinocerous Hornhill and the felling of trees in which the birds hibernated. The keeping and rear nestlings of the hornbill are forbidden.

A total area of 26,748 acres at Matang, Gunong Gading, Loagan and Benut would also be developed into national parks. The present parks are at Mulu. Similajau, Bako, Lambir and Niah, covering about 180 000 acres

The State Government aims to increase national parks area from the present 0.5 per cent to 5 per cent of the State land mass.

A marine biologist from abroad has been employed to study marine turtle depletion in Sarawak's coastal waters and will submit conservation recommendations to the Government.

In 1980, about 43,000 turtle eggs were replanted into the sea in an effort to increase marine turtle population.

Sarawak Foundation scores big successes

KUCHING Dec 80-

The Sarawak Foundation has todate spent about \$12 million on its education programme. Of the total, \$5.1 million was for university education, \$5.2 million for secondary education and \$1.2 million for local scholarships.

So far 155 students have graduated with degrees and 61 with diplomas. Another 273 are still doing courses in universities and colleges, 7 of them pursing masters degrees. The Foundation is also sponsoring a graduate doing his Ph. D. in petroleum engineering in England.

Scholarships awarded to students are for accountancy, agriculture, architecture, business studies, engineering, economic, estate management, forestry, law and medicine, among others,

Under the local scholarship scheme, about 4,000 students from Primary One to Form VI have benefited.

The Sarawak Foundation has also been very successful in its adoption scheme whereby Sarawak students are given the opportunity to mix with and experience life of Malaysians in Sabah and Peninsular Malaysia.

The Foundation was set up in 1972.

Kuching-where the new meets the old

IT is said that when James Brooke, the first Rajah of Sarawak, sailed into Kuching, he saw a cat at where Pangkalan Batu is, thus the "Kuching" meaning "cat" in Malay. That was over 100 years ago.

Today, although Kuching has still in her armpits many historical buildings and old shophouses, the mark of progress is printed all over the State Capital.

The town is evenly spread and development has been steady. The population of 140,000 people spreads roughly into Kuching central, Padungan, Sekama, Pending, Green Road, Kenyalang and Mile 3 districts.

Re-development of the old town itself has been restricted because of the Rent Control Ordinance which allows tenants to occupy those 2-storey, pre-war shophouses indefinitely. As a result, Kuching central itself has remained virtually

unchanged for the last 40 years. The bus station has become too congested and streets too narrow as the town's population rises. Bicycles, a simple tool of transportation, are still very common.

Most new commercial buildings have been built around the existing old shophouses and several multi-storey shopping complexs are coming up.

One significant development is the number of well-planned housing projects in the riverine town. Several thousand families have settled nicely in the Kenyalang, Poh Kwong and Tabuan Jaya housing estates.

Huge low-cost housing projects are taking shape in Kuching By-Pass, Batu Kawa, Bintawa and Kg. Gita across the Sarawak River.

The Sarawak Economic Development Corporation has developed Pending into an industrial area where some of the State's biggest

industries are located. Among them are Cement Manufacturers Sarawak, Forescom- Plywood, Ironwood Shipyard and Yeo Hiap Seng.

An ambitious private commercial project, costing about \$150 million, has been planned on Bukit Mata Kuching, overlooking the Sarawak

The towering 21-storey Tunku Abdul Rahman Building at Petra Jaya, across river, Kuching, Costing about \$50 million, it was completed in 1976. The nerve-centre of Sarawak administration, it houses all Sarawak Ministers' and the State Secretary's offices.

River. Called Taman Sri Sarawak, the scheme will consist of an international standard hotel,

modern apartment buildings complete with swimming pools, an ultra-modern cinema and multistorey shopping complexes. When completed, it

will become the largest single private development project in Malaysia.

Urgent attention has been given to the development of Putra Jaya across River where the ministrial

complex and Council Negri building are. A sports complex will be built and a large industrial area has been planned.

Kuching as seen from across viver near the Islana. Malay sampans, a traditional form of local transportation, are very much in evidence.

The busy Sunday open-air market at Satok Road, Kuching, where for 50 cents a spot, hawkers sell goods ranging from jungle produce to movie-star posters.

Buslting Sibu

The crowded and often busy floating wharves at Sibu. Most of these express launches and speedboats ferry passengers between Sibu. Binatang. Sarikei, Kanowit and Kapit.

ALTHOUGH ranked second largest in terms of population, Sibu is the busiest and richest town of Sarawak, where some of the State's biggest timber firms are located.

The success of Sibu is the success of the hardworking and enterprising Foochows who came to the riverine town over 100 years ago. From a piece of swamp, they have developed Sibu into a modern township of today.

The importance of Sibu is its strategically located position along Sarawak's longest river, the Rajang. Each morning, thousands of people come from the small towns, longhouses and villages at Rajang River's numerous tributories and gather in Sibu, selling their produce and buying the necessities.

Chinese launches and express boats have become a permanent and unique feature of Sibu. Hundreds of them jam the few concrete and floating wharves which have, over the years, become too congested. Manners are discarded as boat "juragans" fight for a berthing space among the endless rows of vessels.

Plans are now in hand to build two more floating wharves for the express boats.

On land, Sibu has the reputation as the worstplanned and most congested town of Sarawak. Because of the population concentration, residential houses have been built too close to one another.

Roads are few and a massive drainage and sewerage system has been planned to rid the town of floodings which occur often because of Sibu's low-lying position along Rajang River.

Sibu's prosperity is mainly a result of the flow omoney from the various timber concessions along Rajang River, notably in Kapit, Song, Kanowit and Binatang.

Some of the State's biggest names in timber industry like the K.T.S. Group, W.T.K.

Organisation, Delta Group, Borneo United Sawmills, Kong Thai Sawmills and Ding Brothers have all begun their empire building in Sibu.

Local banks such as the Hock Hua, Kong Ming and Wah Tat were all started in Sibu and later spread their wings to other parts of the country,

Sibu has thus provided an important base for the hardworking and adventurous Foochows who now control a major part of Sarawak's timber, banking and shipping industries.

Many of the town's businesses and buildings have been started with monies sent home by Foochow men who are working in far away timber camps in Indonesia, often deep in the jungles.

The success stories of some tycoons read like

the Who's Who in from-rags-to-riches stories. A random survey would probably show that Sibu has the most millionaries in Sarawak.

Although money is aplenty, progress of the town has not been very impressive.

In recent years, however, things have begun to look up for the 120,000 residents. Plans have been approved to build a new airport to replace the old, congested one and to expand the Lau King Howe-Hospital to meet the increasing demands.

Large areas of land at Upper Lanang Road have been earmarked for industrial development while a multi-purpose sports complex will be built in the town.

Sibu, the gateway to Sarikei, Binatang, Kanowit and Kapit, is set for better things to come.

Some of the multi-storey apartment buildings at Sibu.

Bintulu reaches for the top

ALL signs are that in a decade's time, Bintulu will be developed beyond recognition, from a small fishing and logging town to Malaysia's heaviest

invested industrial area.

The landscape of this coastal spot in Sarawak's 4th Division is fast changing while several giant projects like the LNG Plant, Kidurong Deepwater Port, Universiti Pertanian Malayais Sarawak Campus and some buge housing projects are steadily taking shape. The change will become more formidable when other schemes like the ASFAN Urea/Ammonia Plant and the Aluminium Smelter begin actual construction.

Since the industrial boom arrived at Bintulu too years ago, the town's population has risen from a mere 10,000 to a six-fold 60,000 by end of 1980. The figure is still climbing and it is predicted that by 1995, the population will reach the 150,000 mark.

Even such an influx of people is still not enough to meet the present manpower demand by the huge projects costing a total of \$6 billion. But the rapid rise in population has pushed Bintulu's accommodation, water supply and public transport facilities well beyond their capabilities. House rents have soared and the town is fast becoming one of Malaysia's most expensive places to live in.

While a small room in a wooden house can fetch \$300 rental a month, a well-furnished detached residence can command a staggering \$8,000 monthly rental. Shophouse spaces are in such a demand that rents have been pushed up to \$3,000 for a ground floor which was wooing tenants for a low \$700 a month before the hoom.

A 3-storey corner shophouse was sold for a record \$900,000 in early 1980 to a hoteller who had got a windfall of \$1.2 million for his suburb 12-acre land.

The continuous streams of company executives, professionals, technicians and salesmen literally pack the few hotels in town and rentals climb steadily. An enterprising businessman had turned one of the Kemena River-side squatter houses into

A new wharf under construction, next to the existing Bintulu wharf which has become too congested since the economic boom began three years ago.

Old, wooden shophouses in Bintulu on the band of Kemena River.

a 20-old-room lodging place, charging \$12 per night for a room.

The issuance of 35 more taxi permits in 1980 has considerably eased the town's public transportation woes but charges remain high. The minimum is \$3 and for a 12-mile trip to Kidurong, \$40.

Labourers are coming from longhouses, villages and other Sarawak towns for the high wages and already Bintulu has earned the name of Sarawak's "Cowboy Town" — streets, coffee shops, cinemas

and prostitutes-occupied hotels constantly filled with tough-talking workers.

In terms of food prices, it is rapidly overtaking most Sabah towns — once the country's most expensive. While a simple meal at a Sabah openair market costs \$2, the same is offered in Binulu for

twice the amount.

The acute shortage of houses has resulted in the erection of more than 100 squatter houses by the bank of River Kemena.

The Bintulu Development Authority is building about 4,000 houses, at stages, to cope with the

housing situation and two private development

firms have plans to construct 220 houses at Mile 4, Bintulu-Miri Road. Covering 33 acres and costing \$20 million, the private project is scheduled to start in early 1981 and finish by 1982.

A 36-room hotel will be built and there are plans to put up two more cinemas on the fast growing town.

The expansion of Bintulu Town is, however, restricted by the airport which is only yards away from a row of new shophouses.

A new international airport, to be sited 12 miles away, is now on the drawing board and when this materialises in 1985, Bintulu residents will have a public park, a town hall and a library in place of the existing airstrip.

Plans to build a massive sewerage system have been given priority to proceed while more shophouses to the existing 200-odd units will also be built in the pert few years.

In ten years' time, the importance of Bintulu, Sarawak's most centrally-located town, is expected to equal that of Kuching, the State's capital, if not exceed it.

One of the thousands of labourers who flock to Bintulu for the high wages. Most of them live in squatter houses.

REPRO BUSINESS MACHINES CO.

12, Jalan Ang Cheng Ho Kuching, Sarawak

Tel: 26041, 58823

SIBU OFFICE:

16, Jalan Khoo Peng Loong Sibu, Tel: 24557

A barge, loaded with logs, is being towed out to sea from Bintulu for unloading the cargo onto a ship. Timber is one of the main industries Bintulu thrives on.

Some of the new, 3-storey shophouses in boom town Bintulu.

New face for Miri

Part of the new township in Miri - about 200 such new, modern, 3-storey shophouses would be built.

THE most striking feature of today's Miri is the 15 new blocks of modern, 3-storey commercial buildings which easily outnumber the old, 2-storey shophouses.

The new township is still growing in where Kampong Dagang was, although commercial activities are very much concentrated in the old township where the bus station and central market are.

Essentially the oil town of Sarawak where about 90,000 barrels of crude oil are produced daily by Sarawak Shell, Miri's economy is boosted by the several timber camps around it.

Capital of the 4th Division, Miri has always capital or a commercially active town. It has suffered, however, by the treacherous, shallow Miri River mouth and inadequate wharf-facilities. Goods consigned by the sea get damaged while being unloaded from ocean liners off Miri and delays at the Customs Wharf add extra charges to the merchants' bills. As a result, things are more expensive in Miri than in Kuching or Sibu.

The State Government has completed a feasibility study on the setting up of a Miri port and this obviously is being anxiously awaited by Miri's 100 000 residents.

Although there are hopes that when the dependent port in Bintulu is completed, goods can be transported from there to Miri, it is estimated that things will not get any cheaper after travelling the 134 miles of gravel road between the oil town and the port.

Miri has its share of historical glory. In 1910, oil was first struck in Sarawak, up on Miri's Canada Hill. Today, Oil Well No. I stands an important historical landmark, after pouring out some 660,000 barrels of crude oil. The oil produced in Miri continues to provide a vital source of income for the State's coffers.

An important link for Sarawak with Brunel, Miri provides a road connection to the oil-rich Sultanate especially after Malaysian Airline System had ceased to fly between Sibu/Miri/Bintula and Bandar Seri Begawan. There were plans to seal the 47-mile sandy stretch between Miri and Kuala Belait but they had been shelved.

Tanjong Lobang Beach, 4 miles from Miri, is a popular picnic spot and the food stalls under the trees are doing brisk business, especially during weekends.

The continous flow of oil and exploitation of timber areas will doubtless keep Miri prosperous in many more years.

The severely-congested Customs Wharf at Miri. Lighters, loaded with cargoes, almost um the Miri River.

The ferry transporting people between Miri town and the General Haspital across the river. In the background is the treacherous river mouth in which many ships had been grounded because of its shallowness and moving sand.

SABAH CHIEF MINISTER YAB DATUK HARRIS MOHD. SALLEH

SINCE becoming Sabah's Chief Minister five vears ago, Datuk Harris Mohd. Salleh has proved himself a leader devoted to his task, initiating and launching development projects, one after another. The pace is swift and in a short time. Sabah has become the fastest and foremost developing State of Malaysia.

The Chief Minister has placed the uplifting of rural population's living standard high on his priority list in his development crusade. He set up various agencies to help the farmers and fishermen, who are among the lower-income group and many of whom live in remote and sometimes isolated villages. The long and helping arms of Korporasi Pembangunan Desa (KPD), Sabah Marketing Corporation (SAMA) and Korporasi Serbaguna Nelayan Sabah Bhd (Ko-Nelayan) have, in a

relatively short time, raised the rural folks' standard of living and brought promise of a better tomorrow. Despite handicaps in the shortage of manpower and communication difficulties, Sabah has made glam strides in progress in most fields. For Datuk Harris, it is no mean achievement in filling the State's coffers from 1976's tottering \$6 million with 1980's remarkable \$1.25 billion and restoring investor's confidence in Sabah's future.

Halled as one of Malaysia's most diligent and go-getter Chief Ministers, he travels frequently and extensively throughout the State to ensure the efficient functioning of government machinery and the smooth implementation of various development projects. Born in Labuan on Nov. 4, 1930, Datuk Harris aunted his career as a teacher in Beaufort before becoming a clerk in the Resident's Office in his home town. Later, he went to study Public Administration in Australia and on return to Sabah, was appointed Chief Clerk to Resident, Tawau. He rove to Asst. District Officer of Sipitang and was later promoted to Clerk of the State Legislative Assembly.

In early 1963, he left government service to go into politics and became a member of United Sabah National Organisation (USNO). When Malaysia was born on August 31, 1963, he was appointed as Local Government Minister. One and

a half years later, he took over the Finance Ministry and later still, was appointed Minister of Industrial Development.

Unhappy with the ways things were run, he left USNO and became a Co-Founder of Bersal Rakyat Jelata Sabah (BERJAYA) in 1975. The following year, Party BERJAYA won the general elections and on April 20, 1976, he was sworn in as Deputy Chief Minister.

The burden of leading Sabah was placed on him when, on June 6, 1976, a plane crash in Sembulan, near Kota Kinabalu, killed 11 persons including then Chief Minister Tun Mohd. Fuad Stephens. Same night, Datuk Harris was sworn in as the State's 6th Chief Minister.

Awards: SPDK, 1968; SSDK, 1978; SPMP, 1978; SPMS, 1980; DABK, 1980; SPMJ, 1980. Address: Chief Minister Department, Ban-

gunan Yayasan Sabah, Kota Kinabalu.

MESSAGE BY SABAH FINANCE MINISTER YB DATUK HAJI MOHD. NOOR HAJI MANSOOR

MY congratulations to Malaysia Timor Publications for the initiative taken in publishing a commemorate book on Sabah's 18 years within Malaysia.

The publication is indeed timely as the State has, especially in the last five years, developed by leaps and bounds despite being handicapped by shortage of manpower, road communications and other related problems.

There is no denying that Sabah with the people-oriented ruling Berjaya Government implementing its pragmatic, practical and down-to-earth programmes and politicies, has become the foremost and fastest developing state in the country.

Its rich and bountiful natural resources, its political and racial stability have attacted domestic and foreign concerns into investing millions of dollars in the State.

The publication of this book is therefore invaluable in projecting Sabah as a state where the socio-economic objectives and restructuring of society under the New Economic Policy are being vigorously and zealously undertaken.

It could also serve as reference materials for those needing an in-depth and closer study of the State while, at the same time, publicising the concrete steps the State Government had embarked on to improve the quality of life of the people.

(HAJI MOHD. NOOR HAJI MANSOOR)
Minister of Finance

Sabah — heaven for investors

SABAH, the romantically fabled "Land Below the Wind"— with its misted high mountain ranges, temperate fertile plateaus, sun-kissed golden beaches lapped by the blue clear water of the surrounding seas, and with its diverse and colourful races— is today becoming increasingly better hown for its pace of development and abundant economic opportunities. The state is experiencing an unprecedented pace of rural and industrial development, a pace that gathered impetus in the mod-70's, and has since accelerated, affecting nearly all the important facet of the country's socio-economic structure.

In the last five years especially, Sabah has undergone tremendous development. Helped along - and often initiated - by a government that believes in meticulous planning, yet fired with daring visions, with an increasingly efficient administrative and entrepreneurially-inclined civil service. Sabah today ranks as the leader amonost Malaysian states in economic development if one uses the percentage of TMP projects already implemented as a yard-stick: Sabah has already achieved 95% implementation rate for its projects under the TMP. No mean feat this - when one considers that at the mid-team review of the TMP, the present State Government requested and got from the Federal Government nearly as much funds (and by enteusim, took upon itself to complete a vastly increased number of projects) again as the initial TMP allocation. This expression of confidence by the Federal Government in the State Government has been justified again and again, and must have also been in fact inspired by the government's astute handling of its finances, having brought the public coffers from a tottering \$6 million in 1976 to a respectable \$1.25 billion in 1980.

Not ones to sit back on their laurels for a breather, the present leaders have already asked for 58.7b for the FMP, a three-fold increase over the TMP's total allocation of \$2.7b.

The current very optimistic outlook — and justifiably so — is catchy, and Sabah has attained the reputation of being the state "where the money is". Foreign investment is pouring in, often into joint ventures with the public or private sector — attracted by an environment of political stability and economic diversity and by government incentives development textbooks theories on, and be-spectacled professors yearn for in the implementing as indeed is true about nearly all the

social and economic development strategies and projects planned for the country.

The government has played a leading role in the transformation of the socio-economic structure of the country. Through its ministries such as the Ministry of Industrial and Rural Development (MIRD), large and powerful agencies such as the Sabah Foundation, SEDCO, KPD, Ko-Nelayan, Kosan, SAMA and various subsidiaries, the government has successfully initiated, stimulated and coordinated an increasingly long string of ambitious ordinated an increasingly long string of ambitious

projects the enormity and number of which make the mind literally boggles. The state has begun diversifying form being basically reliant on timber into timber-based industries, agro-based industries heavy and small scale industries and into commercial farming. Large scale projects encompassing all these have sprouted and are still coming up all over the country. In the rural sector, the government has begun an ambitious and meticulously planned programme to educate and win over the rural folk into participating in the country's development.

On the social, welfare and educational front, the state has achieved a number of impression with the saged, annual dividends to permanent residents from the profits of government participated business ventures, free milk, uniforms and textbooks to school children, generous government aided secondary and tertiary education, and so on. A \$70m sports complex that can host international competitions is also in the offing.

With a government that has ministers talking about public sector managers (rather than mere civil administrators), that welcomes healthly competition and seems not to know the word zenophobia, that has streamlined government agencies to render assistance to serious potential investors and that has a stable political climate, it is no wonder that money is pouring into the country's ranay ropicets.

The mood is optimistic indeed, and with the government always mindful of the need for a balanced growth, and mindful of the environment, there is no doubt that Sabah has already entered the era of becoming potentially the richest and fairest land in the whole of Malaysia.

important political events in Sabah

· United National Kadazan Organisation (UNKO) was formed under August 1961 leadership of Tun Mohd. Fuad Stephens, drawing support from Kadazans in Penampang, Papar, Tuaran, Ranau and Beaufort. December 1961 - United Sabah National Organisation (USNO) was formed by Tun Datu-Haji Mustapha bin Datu Harun. Support came from Bajau, Suluk and Malays. - United Nation Pasok Momogun Organisation (Pasok Momogun) was January 1962 formed by Sedoman and G.S. Sundang, getting support from Kadazans in Keningau and Tenom, also Chinese and Murut. 1961/1963 - Democratic Party and United Party were born, representing Chinese interest. They later merged to become Sabah Chinese Association (SCA), led by Datuk Khoo Siak Chiew and Datuk Pang Tet Tshung. July 1963 - Sabah had first elections. (A) Legislative Council 18 seats: Results: USNO 8, UNKO 5, SCA 4 and Pasok Momogun 1, (B) District and Town Councils 137 seats: Results: USNO 53, UNKO 39, SCA 27, Pasok Momogun 12 and Independents 6. Tun Fuad was appointed as first Chief Minister. Sept 16, 1963 · Sabah became independent by joining Malaysia. Tun Mustapha was installed as first Yang Di-pertua Negeri. June 14, 1964 - UNKO and Pasok Momogun merged to become United Pasok Momogun-Kadazan Organisation (UPKO). Tun Fuad was appointed President. December 1964 - Tun Fuad resigned as Chief Minister. Encik Peter Lo, then Federal Minister for Sabah Affairs, was appointed second Chief Minister in carctaking Cabinet. - Tun Fuad resigned post of Federal Minister for Sabah Affairs and August 1965 returned to Sabah. Same year, Tun Mustapha relinquised appointment of Head of State. Both went into active party politics. April 27, 1967 - Sabah held first direct Legislative Assembly elections. Results: USNO 14, UPKO 12, SCA 5 and Independent 1. USNO and SCA formed coalition government and Tun Mustapha was sworn in as Third Chief Minister. Nov 2, 1967 An UPKO assemblyman, Datuk Pavar Juman, joined USNO, USNO now had two-third majority in State Legislative Assembly. Dec 28, 1967 UPKO was dissolved. 1968 - Tun Fuad was appointed Malaysian High Commissioner to Australia. May 15, 1969 - Parliamentary elections were suspended following May 13 racial disturbances in Peninsular Malaysia. Under emergency rule, Chief Minister Tun Mustapha as Chairman of State Council was given powers including those of detention without trial under Internal Security Act.

DJRD-Sabah's investment agency

DEPARTMENT OF INDUSTRIAL & RURAL DEVELOPMENT (DIRD)

When Established: 1972 Date Revived: 1977

Mala objectives:

- To raise the people's real income by creating more jobs in industries of raw materials production and processing
- To restructure ownership of industrial and commercial assets under New Economic Policy
- · To diversify Sabah's economic base
- · To attract foreign investment

Main Functions:

- To implement all matters of the Ministry of Industrial & Rural Development
- To promote investment in Sabah, particularly agro-based industries
- 3. To provide assistance to investors
- 4. To evaluate project proposals

THE chief role of Sabah's Department of Intervisial & Rural Development, the most important arm of the Industrial & Rural Development Ministry, is to oversee orderly industrialistation progress and to woo foreign investment into the resource-rich State. Its revival in 1977 was followed by a concrete policy to process and utilities as much as possible, and in the shortest possible time, depletable resources like timber, copper and off-shore gas.

As Secretarist to the Industrial Co-ordination Committee (ICC), DIRD has been hailed as the one-stop-investment-agency of the Sabah Government. Much red-tape has been cut as DIRD evaluate, advises, provides all necessary assistance and approves project proposals.

A total of 174 projects were approved from 1976 to 1979, with investment money of M\$387 million. These projects have generated about 8,400 jobs. Of the 174 licences, 83 were for manufacturing and 91, trading. Most of the industries are located in Kota Kinabalu, Sandakan, Tawau, Tuaran and Labuan. However, an

increasing number of projects are taking shape in less developed districts like Kuala Penyu, Semporna and Ranau.

The fact that 74 (43%) out of the 174 projects approved from 1976-1979 were either wholly owned or whose majority shareholdings were held by Bumiputras reflects DIRD's efforts to have more Bumiputra participation in the country's economic development. In 1979 alone, Bumiputra share of newly-approved ventures was close to 60%, holding 42% of the 71 projects approved by DIRD.

Seizing the State's open-door investment climate and the abundant natural resources, foreign investors have been pouring their money into Sabah. Over the past four years since 1976, about \$6 billion worth of investment from foreign and local enterpreneurs has been committed. Apart from this, a few multi-million dollar projects are in the pipeline. They include:

1. Copper Smelter Project

A joint Federal/State Task Force has appointed Davy McKee, a British consultant, to carry out a feasibility study. Tentative site for the project costing \$600 million is Usukan, Kota Belud. The smelter will be capable of producing 40,000 types of copper products.

2. Sponge Iron Project

A joint venture, \$325 million project between Sabah Government and Korea's Daewoo Industrial Co Ltd, it will be sited in Rancha Rancha Industrial Estate, Labuan. When completed, it will employ about 300 persons and produce 600,000 tons of sponage iron per year. On-stream date: 1984.

 North Sabah Pulp, Paper and Timber Project

Project study for this \$700 million venture has been completed. The pulp mill will be prefabricated in Sweden. It will be located close to Kg. Mempakad on the south-east coast of Marudu Bay.

Under the Fourth Malaysia Plan, Project Investment Unit under the Chief Minister's Department will be responsible for major projects requiring high level technology. The Unit's attention well be wholly towards the implementation of the Sponge Iron Project, Pulp Mill and Copper Smelting Plant. DIRD, meanwhile, will continue its crucial role of co-or-finating and promoting small industries, particular, agro and forestry processing.

Leading force for people's advancement

SABAH FOUNDATION

When Established: 1966 When Re-organised: 1976

PERHAPS the most significant contribution by the Sabah Foundation is its efforts in providing more and better educational opportunities and facilities for the young generation of Sabah. It is the only government agency in Malaysia which gives free milk, uniforms, shoes, textbooks and pencils to school children. These generous handouts which cost the Foundation thousands of dollars a month undoubtedyl lessen many a poor parent's burden and go a long way in instilling in the young hearts the care and hope their country has for them.

Descrying students are able to further their studies, thanks to the Foundation's scholarship, sponsorship and study loan schemes. From 1967-1979, 20,600 scholarships were awarded and 540 study loans given.

The Agency has granted \$5 million for the establishment of Yayasan Sabah-Institut Teknologi Mara's permanent campus at Kuala Menggatal.

The permanent campus of Universiti Kebangsaan Malaysia will also be built in Likas with funds from the Sabah Foundation.

Not small sums are spent in the Flying Doctor Service. With a budget of \$30,000 a month, the helicopter doctor and his team of medical personnel bring relief to suffering dwellers in their otherwise inaccessible remote villages.

The unique annual cash distribution schemes through the Amanah Rakyat Sabah benefits every Sabahan and permanent resident of 21 and over. Last two years, each of the 400,000 shareholder got \$100.

When the mammoth \$70 million sports complex, now being constructed by Sabah Foundation, is complete in 1983, Kota Kinabalu can boast to have the best sporting facilities in Malaysia.

In order to carry out its educational and social projects, which by any standard are huge, Sabah Foundation needs to have a continuous source of funds. They come in timber sales from the Agency's 3,000 sq. miles of timber land. Gross income for 1978 was \$160 million and in 1979, the figure rose to \$300 million.

With such abundance of funds and the determination of Sabah Foundation's Board of Trustees

to advance the welfare of the Sabah people, it can be envisaged that the Foundation will continue to play a leading role in the State's social and educational development.

Part of the mammoth \$70 million international-standard sports complex in Kota Kinabalu under construction. Spreading over a 300-acre site, it will have a 400-metre track, soccer/athletic field, sheltered grandstand, hockey pitch, 200-person gymnasium, playing courts, sports library, sports museum, 50-metre 8-lane Olympic standard swimming pool, diving and playpools and artificial lake. Other facilities will include a 400-person sports hostel, football field and football cum rugby field. The main outdoor stadium is designed to cater for 50,000 spectators. After its scheduled completion in 1983, the complex will be handed over to Sabah Government for running.

A worker felling a tree in a Sabah Foundation concession area. The Foundation's funds come almost entirely from timber sales. In 1979, 33 million cu. ft. of round logs were exported, bringing in a hefty \$300 million.

Albiziu Falkataria — one of the fast growing trees planted in Yayasan Sabah's reafforestation program. While felling trees for its funds to run its various educational and social projects, Sabah Foundation is replanting forested land to ensure the continuance of timber's economic life. 350 acres are under reafforestation in Lahad Datu and a giant 150,000-acre scheme is progressing well in Tawau. 2,000 jobs have been created under the Foundation's reafforestation program.

HO-NELAYANThe Benefactor of Sabah's Fishermen

KOPERASI SERBAGUNA NELAYAN SABAH BHD. SABAH MULTI PURPOSE FISHERMEN'S CO OPERATIVE LYD

State-sponsored Ko-Nelayan Sabah's Fisherman's Co-Operative Society, Safeguards the future of our fishing industry and promotes the welfare of our 14,000 fishermen and their dependents. Not only does it provide low interest loans and training programmes for advanced fishing techniques, it also implements diverse aquaculture projects to generate alternative employment and reduce our fishermen's dependence on the sea. Besides providing the resources, the facilities and the expertise, it also identifies new markets and demands to supplement the fishermen's income.

The consumer too, domestic or foreign, benefits from Ko-Nelayan's efforts in up-grading the local fishing industry.

Building a progressive farming society

KORPORASI PEMBANGUNAN DESA (KPD) (RURAL DEVELOPMENT CORPORATION)

Date Established: July 1976

Main Objectives:

- Improving rural people's economic and social well being, particularly the poor
- Inculcating spirit of self reliance among rural communities
- Increasing agricultural production and accelerate development of agro-based industries
- Encouraging modern, progressive and commercial farming in in-situ areas
- Producing skilled bumiputra enterpreneurs in supply of agriculture ancillary services

ONE of the most important agencies set up by the Sabah Government is the Rural Development Corporation, popularly known as KPD, for it is entrusted with the big task of uplifting the economic and social well-being of the more than 75% of Sabah's entire population who live in the rural areas.

Since its inception in July, 1976, KPD has proved that it is metting the challenge extremely well

More than 62 projects have been launched and over \$25 million has been committed in KPD's drive for a progressive rural community.

In Kudat, 3,854 scres of land have been planted with sorghum, malze, padi, mungbeans, ginger, groundnuts, sweetcorn, soyabean and coffee. Eleven kampongs including Kg. Bilangan Kecil and Kg. Bunsadan have had their first taste of progressive, modern agricultural venture. 578 acres in Ranau are now producing carrot, onion, French bean, sweet pea. strawberry, potato, big chilli, coffee and banana, bringing steady income to small villages like Kg. Purakagis and Kg. Batu Lama.

In West Coast, 800 acres in 12 kampongs have been utilised while 1,256 acres in the Klias region have began to show dividends in the pepper, cashewnut and pincapple plantations. Perhaps some

A worker rounding up cattle in Sook Plain, Keningau where KPD has sturted a 1,000-acre cattle jurn.

— Picture by Dennis Lau.

Groundnut harvest at KPD's groundnut scheme in Kota Marudu.

of the most ambitious schemes are sited in Keningau, a fast growing town in the interior, where 4,161 acres have been chosen for planting. Projects have also been started in Kinabatangan in the East Coast where 1,000 acres for cocoa and 5 acres for pawn farming can be found in Kg. Entelibon and Kg. Abai.

Cash crops have also been planted in schemes in Tenom and Semporna.

The giant network of KPD is examplified in the number of ventures — 24 in all — it has either initiated on its own or joint with private enterpreneurs.

A quick glance into some of these ventures will give a picture of their enormous sixes: 15,000 acres for cocoa plantation in Silabukan Peninsular, Lahad Datu by Sabah Cocoa Sdn Bhd: 12,388 acres for cocoa at Labuk Road, 22 miles from Sandakan by Sakilan Desa Sdn Bhd: 3,570 acres for cashewnuts by Sabah Cashewnut Sdn Bhd in Bongawan: 5,500 acres for tropical fruits in Lingkungan and Lumadan by Tropical Fruit Sdn Bhd and 3,000 acres for cocoa in Tawau at Mount Tiger.

These are but a few of KPD's giant schemes, In addition to the many local ventures, KPD has bought a cattle farm of 1,052 sq. miles in Camfield. Northern Australia. The Australian project has proved a success in keeping down beef prices in Sabah. An 1,000-acre cattle farm has now been commissioned in Sook Plain, Keningau for building up local cattle industry.

Pilot growing of apple and strawberries in Kundasang and Ranau has been successful and plans are now in hand to set up a strawberry cultivation industry complete with processing facilities.

The achievements of KPD can be reflected by the assets it has accumulated at the end of 1980; a respectable \$100 million.

There is no doubt that the KPD will continue to be a friend of the farmers while pursuing its goal of creating a modern, progressive agricultural community in Sabah.

SAMA makes immense contributions

SABAH MARKETING CORPORATION SDN BHD

Date Established: October, 1977

When incorporated as limited company: December, 1978

Paid-up capital: \$10 million

Main Objectives:

- To develop a marketing system for agricultural produce in Sabah
- To stabilise prices of agricultural commodities
 To give producers' a fair return for their
- To give producers' a fair return for their goods
- * To actively promote agricultural exports

Marketing Units: Cocoa, Domestic, Handicraft, Livestock, Palm Products, Rubber and Timber.

Sales Turnover: \$88 mil (1978) \$130 mil (1979)

AS the sole marketing agent of the Sabah Government, SAMA contributes immensely to the uplifting of rural people's living standard and the stabilisation of prices in the State, known for her expensive things. Its services, domestic and international, are utilised by Sabah Land Development Board, Agriculture Department, Sabah Rubber Fund Board, Korporasi Pembangunan Desa, Sabah

Farmers' Association, Sarawak Land Development

Board and private companies.

In helping the smallholder farmers, SAMA sets minimum floor prices for their produce and determines the selling prices. The floor prices are the lowest guaranteed for 18 identified crops paid by SAMA. Even if there is a glot in the market, SAMA's purchase prices will not fall below the minimum floor prices. Farmers are thus given a fair return for their goods and assured of a steady income. Such floor prices are determined and reviewed once a year by a panel comprising Agriculture Department, Sabah Farmers' Association, FAMA, SAMA and KPD.

SAMA's mobile purchasing units visit kampungs and regional marketing centres every week in Keningau, Sandakan, Tawau, Kudat and Kundasang to buy products and then distribute them throughout the State. Some are air-freighted to Sarawak. As more than 75% of Sabah's population live in the rural area, this direct-buying-and-selling scheme goes a long way in improving the rural folks' livelihood.

Broadly, SAMA's operations are grouped into (A) profit-orientated and (B) socio-economic sections.

(A) PROFIT-ORIENTATED SECTION

I. Cocoa Marketing Unit

SAMA offers dry cocoa beans on an offerand-acceptance basis to both local dealers and overseas buyers daily. Bids are offen done by telex. This way, better bids are assured from overseas buyers which SAMA passes on to smallholders. A spectrum of buyers has been established in Singapore, the United Kingdom, Europe, Japan, U.S.A. and Australia.

2. Oil Palm Products Marketing Unit

SAMA markets crude and processed palm oil, palm kernels, palm kernel oil and pellets. Apart from handling such marketing for Sarawak Land Development Board, SAMA is also providing training for its personnel for their taking over the role in future. At present, SAMA market about 40% of Sabah's and about 50% of Sarawak's crude palm oil.

3. Rubber Marketing Unit

SAMA markets rubber products for the Sabah Rubber Fund Board and Sabah Land Development Board which buy same from smallholders. One obvious achievement since SAMA took over the Marketing role is the attainment of a price of over 2.28 cents per kiln higher than the Malaysian Rubber Exchange Noon Buyers as at 30 June, 1980.

SAMA now buys RSS direct from smallholders and dealers. Prior to its entry as a buyer, rubber smallholders sold unsmoked sheets and scrap to dealers for the SRPB standard Malaysian Rubber (SMR) factory. They did not necessary get the best money for their goods. Now they can sell their USS to SAMA which smokes it and sells it as RSS if the price is higher. The benefit is passed on to the smallholder.

At SAMA's Karamunsing Rubber Godown, SAMA cuts, grades and packs RSS to international standard for overseas marketing. The agency at present markets about 43% of Sabah's rubber exports.

4. Timber Marketing Unit

Assisting new, smaller timber companies, SAMA buys their products, accumulates into attractive quantities and sells them to EEC countries, U.S.A.. Australia, Hong Kong, Thailand and West Asia. It also actively

promotes: the lesser known timbers like Sclangan Batu which is abundant in Sabah. Active sales promotion by SAMA resulted in the purchase by China of Sclangan Batu logs worth over \$4 million. Malayan Railways is

now a regular buyer of this species for railway sleepers.

Exclusive marketing arrangements with reputable sawmills and extensive marketing centres ensure a bright future for SAMA in its endeavour to promote timber sales.

(B) SOCIO-ECONOMIC SECTION

1. Domestic Marketing Unit

Essentially, SAMA's role is to give farmers a fair return for their produce. Its service is especially important during peak crop seasons when there are excess supplies in the market.

SAMA buys at minimum floor prices, stores the produce for later release into local and overseas markets.

Six Regional Marketing Centres (RMC) have been set up in Tawau, Ranau, Keningau, Kudat, Sandakan and Lahad Datu, These

centres channel their purchased produce to regions where supply is low to bring down the cost of living. At present, there is also a Group Processing Centre (GPC) in Tenom for maize, other grain crops and cocoa. More such GPC will be set up throughout the State.

SAMA's methods of coldroom storage, uaranteed floor prices and sales of produce into higher priced markets have been adopted in West Malaysia. In fact, Sabah is the first State in Malaysia to implement a floor price scheme.

. Handicraft Marketing Unit

SAMA's entry into the handicraft industry gives rural people additional income by marking handicraft during off-planting seasons.

Products, bought at guaranteed prices, include Rungus' Linagoh and Nyvia basketry works.

Muruts, Kadazans and Malays' bamboo, rattan and pandan products, Bajans' kain dastas and mugah as well as marik products and local musical instruments like Sompoton, Gampus and Bungku.

Apart from its four retail outlets at Kota Kinabalu Airport, National Park, Kota Kinabalu Central Market and Lot 47, Bandaran Berjaya, SAMA has established its first overseas centres

at Singapore's Handicraft Centre. Its merchandise can be purchased also at Kuala Lumpur's Sungai Wang Plaza. More importantly, SAMA helps preserve and enhance Sabah's rich cultural heritage.

3. Livestock Marketing Unit

The main force that is keeping meat prices in Sabah at a reasonable level is Sabah

Government's Camfield Cattle Station in Northern Territory, Australia. SAMA which is responsible for the import of live cattle brought 5,849 slaughter cows in 1979 to the State.

The State Government spent \$2.25 million in 1979 to subsidise the beef market and this

has kept the retail market price at \$4.50 — \$5.00 per kati. Consequently, poultry and pork prices are also contained.

ALTHOUGH SAMA's entry as a marketing concern poses challenges to private traders, such competition induces marketing efficiency and results in better deals for the State's thousands of

producers. Indeed SAMA will continue to play its significant role for the farmers and put Sabah on more dots in the world map, than it already has.

Building a modern fishing industry

Part of the 35-strong fleet of fishing trawlers operated by Nelayan Jayadin, a subsidiary of Ko-Nelayan, in Labuan.

KOPERASI SERBAGUNA NELAYAN SABAH BHD (KO-RELAYAN) (SABAH FISHERMEN'S MULTI-PURPOSE CO-OPERATIVE LTD)

Established: September 15, 1978 Authorised capital: \$50 million

Main Objectives:

- Creating a progressive new breed of fishermen.
 - Bringing modernisation and development to Sabah's fishing industry
 - * Increasing per-capita income of fishermen

Main Functions:

- Providing subsidies to fishermen for purchase of new equipment and fishing gear
- Providing low-interest loans on easy repayment terms
- 3. Giving direct services to fishermen in ice,

petrol, diesel, cold-rooms and jettles 4. Providing reliable marketing channels for fishermen's catch

FISHING is an important industry in Sabah which has a coastline of 900 miles. About 16,000 people are fishermen, supporting another 75,000 dependents which comes near to 10% of Sabah 1-million population. They scattered throughout the Siate, used uneconomical methods and relied heavily on middlemen for their survival. Attempts were made to assist them in the part but with little success.

Realising such backwardness and the need to uplift the fishing community's living standard, the Sabah Government set up Ko-Nelayan in 1978. One of the major achievements of the co-operative is the climination of middlemen as fishermen now sell their catch direct to the Agency at fair prices.

Centres and sub-centres in West Coast (South) area. West Coast (North) area. Sandakan area and Tawau area were set up. They provide fishermen with facilities like cold storage, marketing, wharfing and fuel supply. These centres also organise fishermen in groups of 3 to 10, assisted by Jawatan Kuasa Kemajuan dan Keselamatan Kampung (JKKK) who are responsible for settling any disputes that might arise between fishermen.

Usually, Ko-Nelayan grants loans to fishermen on JKKK's recommendations. It gives loans of up to \$25,000 to 3-man teams and \$60,000 to 5-man teams, 40% of which is a subsidy, for construction and equiping of new boats. Trawler owners' can apply for loans of up to \$60,000 to buy engines for their vessels.

Forty-eight youths are now training at Ko-Nclayan's training centre in Labuan. They are mostly school leavers with LCE or MCE. More than 50 groups had already graduated from a three-month intensive trawler course which is conducted with help from the Fisheries Dept.

Numerous projects have been launched by

Ko-Nelayan. Among them are:

 The \$1.7 million Aqua Culture Settlement Scheme in Semporna, 50 families have settled in Oct., 1980 to farm red seaweed, oyster and grouper.

 The \$250,000 Fish-Cage Culture Project at Kg. Serusop, Tuaran, which was started in February 1979. Ten cages are used to culture 3,000 fish fries monthly.

 The \$1.2 million Fishery Training School at Lavang-Lavangan, Labuan.

Research is conducted into the socio-economic situation of Sabah's fishermen so that proper welfare programme can be drawn up for them.

With the extensive assistance from Ko-Nelayan, Sabah's fishermen are now heading, confidently, for prosperous waters.

Female workers sorting out "koropok" made of prawns at the Nelayan Jayadin Jactory at Labuan. This delicacy is especially popular during festive seasons like "Hari Raya" and Chinese New Year.

Ko-Nelayan's Aqua Culture Settlement Scheme in Semporna. Settlers at this \$1.7m project cultivate red seaweed, oyster and grouper. **Pictures** (left) show a technician holding bunch of seaweed and (bottom) some of the houses built for the settlers.

A trainee listening attentively to the instructor who is explaining how a fishball machine functions at Nelayan Jayadiri in Labuan.

Leading force for Sabah youths

KOPERASI SERBAGUNA SANYA BHD (KOSAN) (SANYA MULTI-PURPOSE CO-OPERATIVE LTD)

Date Established: June 10, 1976 Main Objectives:

- To provide business organisational base for Sabah youths, in particular, for SANYA members
- To encourage all youths to invest and own shares in co-operatives
- To assist Government in implementation of socio-economic development projects
- To joint venture with Government agencies, other youth co-operatives and private firms in projects of mutual benefits

THE role played by KOSAN, the co-operative of Sabah's youth body, SANYA, is significant in the country's socio-economic development. Chiefly, KOSAN has been entrusted with the responsible of providing, jobs to unemployed youths and training a new breed of young supervisory and managerial Subahans.

Since its inception five years ago. KOSAN has up a series of social projects aimed primarily at keeping youths employed and helping uplift the living standard of the people. Started as noon-profitable concerns, these projects are expected to eventually become economically viable.

Playing its part in Sabah's economic diversification programme, KOSAN has set up seven companies and joint-ventured in three. All the job and overseas training are given to employees who, on completion of their training, become manager and supervisors of KOSAN's various factories.

(A) SOCIAL PROJECTS

 Cattle Import and Meat Retailing Started in September, 1976, it imported cattle from Australia and sells meat at KOSAN Butchery at Sinsuran Complex, Kota Kinabalu. It also sells poultry, eggs and vegetables.

The Yang Dt-Pertua Negeri of Sarawak Datuk Patinggi Abang Haji Mohd. Salahuddin (2nd from right) and Sabah Yang Dt-Pertua Negeri Tun Datuk Patinggi Mohd. Adnan Robert (ceutre) at Kosan Shoe Factory. Papar during the former's official visit to Saboh in December. 1980. Second from left is Sabah Deputy Chief Minister. Datuk James Ongkili and on extreme right is Kosan General Manager Mr. Vincent Shia.

2. Shoe Factory Paper

First footwear factory in Sabah, it started operation in September, 1980. Workers: 160. Production: 1,200 pairs a day.

3. Multi-purpose Project

Operating units: lawn mowing, house and office cleaning, kerosene distribution and broom manufacturing.

4. Automatic Car Wash

The first and only one in Sabah, Sarawak and Brunei, it was started in June, 1978. Initial operating areas: Kota Kinabalu and Sandakan.

5. Mini Bus Service

Initially 2 mini buses are used in Ranau to cater mainly for school children.

(B) ECONOMIC PROJECTS

1. Garment Factory, Labuan & Tuaran

Started in mid-1978, two factories employ about 300 workers and produce T-shirts, Batik shirts and school uniforms. Plans are in hand to export products to overseas markets.

2. Likas Commercial Complex

To be built on a 1.8 acre land in Likas, the complex will consist of a 1,200-scat cinema, 16-lane bowling alley, twin blocks of 10-storey office/shopping complex and a 120-unit car park. The project, when completed, will become the necleus of Likas.

3. KOSAN Plastic Industry, Likas

Started in April 1977, the factory now employs about 20 workers and produces mainly toothbrush, plastic tumblers. clothes hangers, combs and other plastic household appliances.

4. KOSAN Furniture Factory, Petagas

Production began in 1979 and initially the factory makes furniture for schools and government buildings. It is eyeing the knockdown furniture market in Australia, U.K., Canada, U.S.A. and Japan.

5. Muslim Food Industry, Likes

Production began in November 1976. More than 30 varieties of Muslim cakes are made and sold daily in government offices, schools, coffee houses, canteens and private firms.

(C) JOINT VENTURE PROJECTS

1. Baniok Sdn Bhd

KOSAN's shareholding is 55%. The company manufactures candy and coffee powder and plans to expand sales into Sarawak and Brunei.

Penampang Plastic Foam & Furniture Factory Sdn Bhd

KOSAN hold 50% shares. The factory, besides manufacturing plastic foam and polyproducts, also makes rubber foam and PVC pipes.

3. Kinabalu Printing Sdn Bhd

Half of the shares are held by KOSAN. The second largest printing firm of Kota Kinabalu, is printer for KOSAN's Kinabalu Weekend. There are plans to eventually turn the Weekend to a daily.

4. Universal Gem Centre Sdn Blad

A joint venture with an Australian firm, this Labuan-based company imports sapphires from Queensland, Australia and has Thailand Cutters train the local workers. Finished products are exported to Australia, Canada, U.S.A. and AS.E. Asia.

PLANS have been finalised to build a KOSAN headquarters (Wisma KOSAN) and a 5-storey youth hostel in Kota Kinabalu. A shipping line between Peninsular Malaysia, Sarawak and Sabah has also been proposed as a joint venture between KOSAN, KOBENA and KOSAB.

There is no doubt that KOSAN's continuing active participation in commerce and industry will go a long way in preparing the nation's youths for their various important roles ahead.

SEDCO surges ahead

SABAH ECONOMIC DEVELOPMENT CORPORATION (SEDCO)

Established: 1971 Re-organised: 1976 Main Objectives:

- To accelerate the rate of industrial and commercial development
- To assist bumiputras in business
- To stimulate skill and expertise development

THE long list of companies (20 in all) in which SEDCO is involved reflects the extent this important arm of the Sabah Ministry of Industrial and Rurai Development participates in the state's economic development.

Set up primarily to co-ordinate Sabah's commercial and industrial growth, SEDCO has good into fields which had been neglected by or which were too big for the private sector. Where private enterprises shyed away because of lack of expertise, the Agency has moved in as well so that necessary people can be trained to run such industries.

One of the main roles of SEDCO is to assist bumiputras in business. To this end, Millet Pertaxa and Pertaxas Realiy were set up. The former builds commercial and industrial houses while the latter helps bumiputras own them by providing loans of up to 100% at low interest rates. Repayment periods: Up to 20 years.

SEDCO's activities are not confined to Sabah alone. It has joint-ventured with Sarawak Economic Development Corporation in setting up the Cement Manufacturers Sarawak in Kuching and plans are in hand to start a cinema chain throughout Malaysia.

On the financial sheet, SEDCO's is a success story, In 1979, the group turnover was \$175 million. The following year, the figure climbed to over \$200 million. It does not stop here and already the Corporation is looking ahead. Most likely, it will go into the exploitation of its 50,000 acres of timber land.

As the management put it, the biggest success of SEDCO will be the day when the private sector takes over the shares now held in trust for the people by the Corporation.

Sabah shipyard looks ahead

SABAH SHIPBUILDING, REPAIRING

& ENGINEERING SDN BHD

When founded: 1972
Date operational: 1975
Authorised capital: \$40 million
Shareholding by SEDCO: 86%
Site: Rancha Rancha Industrial Estate, Labuan
Area occupied: 30 Acres
No, of workers employed: 420

Main Lines of Business:

- Ship construction, conversions, repairs and maintenance
- Structural steel engineering, fabrication and erection
- Mechanical engineering

Capacity in ship building and repair: 12,000 DWT

SABAH Shipbuilding, the biggest shippard in Malaysia Timor, was incorporated as a private company on July 6, 1972 with an authorised \$2 million capital. It commenced contractual work in January, 1975 after signing contracts with the Sabah Government to build a tug and a landing craft.

The following year saw the company diversify its activities into steel structual fabrication and erection, owing to the noticeable lack of further shipbuilding contracts.

Since then new contracts came in and the company's authorised capital was increased to \$40 million. To date, 12 vessels have been built.

Ideally sited at the Rancha Rancha Industrial Estate in Labuan, the shipyard is blessed with deep water access, shelter from prevailing monsoons, strategic geographical location and free port status, In 1980, it launched the 2,000 ton cattle carrier "DESA", the biggest ship ever built in Malaysia, which belongs to Koperasi Pembangunan Desa. The vessel now transports cattle from Australia

to Sabah and timber vice versa. The shipyard has also won contracts to build 12 log carriers costing a total of \$192 million for the Sabah Foundation.

Encouraged by its successes, Sabah Shipbuilding has decided to further develop its facilities so as to cater for vessels of up to 20,000 deadweight

tons. In the plans are a "shiplift" system, covered steel stock area, steel preparation and fabrication bays and building hall, among other extensions. It is safe to predict that in a few years time

Sabah Shipbuilding will be a name to be reckoned with in the shipping world of this region.

Steel fishing travelers under construction. To-date, Sabah Shipbuilding, Repairing & Engineering has built 12 vessels including a 24-metre tug, 25-metre landing craft, 20-metre Tri-Marun vehicle ferry and 82-metre cattle carrier.

Desa, the 2,000-ton cattle carrier owned by Sabah's Rural Development Corporation, built by Sabah Shipbuilding. It's the biggest ship ever built by a local shipyard in Malaysia.

Tolong, the first twin-screw tug built by Sabah Shipbuilding.

Sabah ports grow

SABAH PORTS AUTHORITY (SPA)

When Established: 1968

Main Functions: To provide, maintain and manage efficient port services and facilities in Sabah.

Ports Under Jurisdiction:

Kota Kinabalu, Sandakan, Tawau, Semporna, Lahad Datu, Kudat and Kunak.

Kota Kinabalu Port

a. Old Port: Dimensions - 647 ft. × 475 ft. (T-Shaped) Draft - 25 ft. & 21 ft. Storage Space -

3 sheds: 73,810 sq. ft. Open Yard: 55,000 sq. ft.

 New Port: Dimensions - 700 ft, × 215 ft. × (400 ft. × 2)

(Island-Type) Draft - 30 ft., 19 ft. & 25 ft. Storage Space -

> 1 Shed: 72,000 sq. ft. Open Yard:

165,000 sq. ft.

Sandakan Port (Island Type) Dimensions: 700 ft. × 250 ft. × 540 ft. Draft: 30 ft., 20 ft. & 21-31 ft.

> Storage Space: 1 Shed - 88,000 sq. ft. Open Yard - 165,000 sq. ft.

Tawau Port (T-Shaped)

Dimensions: 650 ft. × 275 ft. Draft: 20 ft.

Storage Space: 2 Sheds - 44,000 sq. ft.

Open Yard - 18,000 sq. ft.

THE healthy trend of Sabah's economy is reflected by the steady growth of the shipping and

cargo tonnage handled by Sabah Ports Authority's seven ports over the past years.

The number of ships using SPA ports jumped from 1971's J.212 to 1978's 6,539. In 1978. I 0 million tons of cargo passed through the seven ports while only 2 million tons were handled in 1971. Sandakan Port was the businest in 1978, servicing a total of 2,754 ships with cargo of 4.5 million tons. Tawau Port came second, handling 1,456 ship carrying 2.3 million tons of cargo. Although only 625 vessels used Lahad Datu Port in 1978, the tonnage of cargo stands at a respectable 1 million. Kota Kinabalu Port handled 1 million tons of cargo and the number of ships: 1,166.

The Sabah Port Authority, constantly on the outlook for better service and facilities, spent more than \$100 million to expand Kota Kinabalu and Sandakan Pors in 1977. In late 1979, construction work for the \$64 million Tawau Port Expansion Project was launched. When fully completed in 1992, Tawau Port will be upgraded to the same level as her two sister ports in Sandakan and the State Capital.

Other projects now in progress are:

- \$1.2 million land reclamation (7 acres) for Kota Kinabalu Port
- \$3 million Lahad Datu Port extension
 For its long-range planning, the SPA
 commissioned in 1976 a 20-year master plan study.
 A series of development projects, which have been

identified and planned, are implemented in stages.
Under the 4th Malaysia Plan, \$66 million will
be spent to expand Kota Kinabalu Port. The project
is expected to be completed by 1984. A further
\$19 million is to be spent for Sandakan Port
expansion and the completion is expected under

Utilising the land

SABAH LAND DEVELOPMENT BOARD (SLDB)

Date Established: January 1, 1969

- To resettle people from remote areas to administrative centres
- To bring about more equitable distribution of rural income
- To create a stable and progressive agricultural system

SINCE its inception till 1978, SLDB has developed 27 major settlement schemes with an impressive planted area of 80,000 acres, housing more than 2,304 families. The main crop grown is of palm while rubber, cocoa and coconut also feature prominently.

Out of an gazetted 228,800 acres, 77,400 acres were planted with oil palm, 4,300 with rubber, 2,000 with cocoa and 1,200 with coconut. By the end of the 3rd Malaysia Plan in 1980, it is estimated that 11,000 families would have been resettled.

SLBD allocates 10 acres of land to each family. In addition, each family gets a quarter of an acre with a house built by SLDB. As SLDB buys all produce from the settlers, the latter are assured of a steady income. It is estimated that in an oil palm

scheme, the farmers will be able to harvest their fruit on the 3rd year of planting. The income increases from 3rd year's \$625 to 8th year's \$10,000

per 10-acre holding, basing on the price of \$125 per ton.

Five SLDB oil palm mills at Apas Balang, Silabukan (Tawau), Sg. Manila, Suan Lamba

(Sandakan) and Beaufort process dally settlers' Fresh Fruit Bunches (FFB) into oil and kernels for export. There are three bulking installations at Karamunting, in Sandakan, Tg. Batu in Tawau and Lahad Datu with a total capacity of 32,000 tons for storing palm oil.

There has been a steady increase of production of FFB from 1976 to 1980 in SLDB's oil palm schemes. Production of processed oil and kernels also rose from 1976's 52,500 tons to 1980's 84,700 tons. The foreign exchange these exports have carned have contributed significantly to Sabah's economy.

Utimately, SLDB will let the settlers run their own scheme when it finds them suitable for shouldering the responsibility. It will then play an advisory role.

As only less than 20% of Sabah's 5.4 million acres of agricultural land has been ultilised, the potential for land development is extremely great. With such a prospect, SLDB will no doubt continue to play its meangingful role in the country's economic development.

Big task for SRFB

SABAH RUBBER FUND BOARD (SRFB)

When Established: 1950

RUBBER is an important foreign exchange carner for Sabah and the task of the Sabah Rubber Fund Board in raising the rural small holdings productivity is big.

SRFB's efforts in helping raise the rural growers' income mainly centre on replanting Moribund Rubber with High Yielding Rubber, other crops or newplanting of High Yielding Rubber, other li 1965, the total acreage of High Yielding Rubber in Sabah was 140,000, 75% of which belonged to smallholders.

During the 1st Malaysia Plan (1965-70), 14,800 acres were neplanted while 5,000 acres were replanted. A Crumb Rubber Factory was set up in Putalan. 12,800 smallholders received assistance from SRFB which replanted 25,500 acres with High Yielding Rubber, coconuts, fruits, wet padi and cocoa under the 2nd Malaysia Plan (1970-75).

SRFB achieved 80% success under the 3rd Malaysia Plan during which it replanted 11.100 acres of Moribund Rubber. Smallholders were given grants including fertilizers, planting materials and pesticides worth about 5900 per acre. It scored 100% success in its schemes of replantation with cash crops and new plantation. 11,000 acres were

replanted with cocoa, coffee and fruits while 19,000 acres were new planted.

SRFB's Purchasing Units buy directly from smallholders and process the rubber into Standard Malaysian Rubber. A total of 41,876 tons or 30% of smallholders' production was purchased from 1976-1980.

The 2,756 tappers who graduated from SRFB's Training Centre at Topokon in Tuaran would spread their acquired skills to rubber estates throughout the State.

SRFB's land rehabilitation scheme has turned idle land into producing lots. A total of 8,285 acres were grown with coffee, cocoa, coconut and fruits with SRFB's grant of \$500 per acre.

Major development has taken place in Tenom where a crumb rubber factory has been set up and 8,000 acres for 800 settlers were embarked for newplantation.

Another 3 00 acres and 480 acres respectively were set aside in Tuaran and Biah for 348 settlers.

In the pipeline under the 4th Malaysia Plan are the replantation of 25,000 acres, newplantation of 25,000 acres, rehabilitation of 12,500 acres, setting up of a crumb factory in Papar and the training of 4,500 youths.

Indeed, with the assistance of SRFB, Sabah's rubber growers, especially the small-holders, cur look forward to a promising future.

Mt. Kinabalu holds her charm

The magnificent Mt. Kinabalu. At 13, 450 feet, it is the highest mountain in South East Asia.

THE magnetic power of Mt. Kinabalu has ner diminished, even though, increasingly, people have been coming to Sabah because of her abundant conomic opportunities in recent years. On the contrary, the economic boom has resulted in more visits to this South East Asia's highest mountain. The number of visitors has constantly been

climbing, from 1970's 3,286 to 1978's 10,771. There were only 949 visitors in 1965.

In 1964, Kinabalu National Park was established to protect and preserve the awesome 13,455 ft mountain, its extraordinary plant and animal life. The road leading to the National Park Readquarters has now been sealed and there is a helicopter service ferrying visitors from Kota Kinabalu to the Park, a comfortable 25-minute ride. By road, it takes 2 hours to cover the 90 kilometres. An international-standard hotel, Mt. Kinabalu Parkroyal, has been built at Kundasang at the foot of Mt. Kinabalu in 1980. Costing \$9m_i thas 75 rooms.

Generally there are two catogories of climbers: the mountainers, the botanists and zoologists. Whatever they are, none will be unmoved by Mt. Kinabalu's breathtaking scenery and cool climate. Its easy accessibility has made Mt. Kinabalu, "the homeland of the spirits" as claimed by local Kadazans, the most popular park in Malaysia. The word "Kinabalu" is believed to have come from "Akı Nabalu" — meaning the revered place of the dead in Kadazan. Another theory is that it stems from "Kina" meaning "China" and "Balu" meaning "Widow". Legend has it that a heart-broken Kadazan woman, after being jilted by her Chinese Prince husband who had gone back to China, climbed up the mountain to pray for his return. There she was turned to stone. In fact, in early years, Mt. Kinabalu has been popularly called "Chinese Widow's Mountain" in Chinese.

The first recorded ascent of the mountain was made by Sir Hugh Low, a government officer from Labuan, in 1851. To commemorate his accomplishments, Mt. Kinabalu's summit was naned "Low's Peak", although Sir Low did not reach it. There is also "Low's Guily" and several plants and animals found on the mountain also bear his name.

Lillian Gibbs, an English botanist, became the first woman to ascend Mt. Kinabalu in 1910.

At least two days is required to climb Mt. Kinabalu. Some of the attractions at the Park are Kundasang War Memorial, Poring Hot Springs. Open-Air Baths and Langanan Waterfall.

Marine park planned

MALAYSIA's first marine park is taking shape near Semporna, an East Coast town of Sabah. A team, operating under the auspices of the World Wildlife Fund and Sabah National Parks, is drawing up a detailed management plan. A survey by 15 marine ecology experts was done in, September, 1980. The survey focused on the characteristics and value of the reefs and islands of the Bodgawa Islands.

The proposed marine park will encompass 6 islands, several of which are flat, sandy and dominated by outcrops of occonuts palms. Pulau Bodgaya is the most outstanding, at a height of 1,500 feet. All islands are surrounded by extensive fringing refes with depths of 60 to 150 feet.

The islands and the reefs create and almost totally enclosed lagoon.

The location of the two parts of the Sabah marine park (in circles). At the top is the Bodgaya Islands and bottom, Sipadan Island.

Assemblying own cars

KINABALU MOTOR ASSEMBLY (KMA)

Date established: June 1974 When operation commenced: July 1979 Paid-up capital: \$5.75 million Shareholdings: SEDCO - 62%

THE equity structure of Kinabalu Motor Assembly (KMA) reflects Sabah Government's aspiration towards the New Economic Policy. While

SEDCO holds 62% and Malaysia Tractor & Equipment Sdn Bhd has 23%, the remaining shares are held by Sabahan Bumiputras.

Since its inception, more than \$9 million has

been invested by KMA on fixed assets including modern machinery. In order to meet future competition, KMA ultilises the latest available facilities like special body fixtures, spot welding guns, electrical welding system and a complete paint shop system. Although capable of producing 24 vehicles a day, it is rolling out only 4 daily at present. When more markets are found, it will go into full production.

Being the sole assembly plant in Malaysia for Isuzu trucks, KMA is turning out a pool of young local technicians at its Likas factory. Apart from

supplying Isuzu trucks for local needs, KMA is expanding its sales into Sarawak and has plans to enter the Peninsular market as well.

To create a bigger market for locally-made goods, KMA has decided to use more Malaysian manufactured component parts in addition to tyres, inner tubes, paint and batteries.

Future in copper mine

SABAH Government, through SEDCO, came in the rescue of Malaysis's first and only copper mure. Mamut Mine, in early 1980 by buying a 49% cqulit in Overseas Mineral Resources Development Sabah Bhd (OMRD) which manages the industry. Two reasons were behind the bold move: Sabah the comment's policy of ensuring that natural wealth be kept in the hands of the people and OMRD's inle in Sabah's socio-economic development.

since its operation in 1975, OMRD had been unning the copper mine, sited on a slope of Mt. Kinabalu, at a loss because of low copper price and other factors. The company, a joint venture between OMRD-Tokyo and Malaysian investors, had won the mining rights by tender after United Vations scientists had found one deposit under UNS. Labuk Valley Project in 1965.

The ore deposit area, about 1.2 sq. km, has an estimated reserve of 83 million tons up to a depth of 200 to 300 metres. The mine life can last until 1991, bringing about \$2 billion in foreign exchange for Sabah.

OMRD has invested about \$300 million in machinery, site preparation, road and building construction, power plant installation, crushing and milling plants and port facilities in Usukan Bay. Crude ore of 18,000 tons are milled daily to produce 10,000 Dry Metric Tons copper concentration which is exported to Japan for smelting and processed into electroyttic copper of 99,9% pure grade. Up to February 1980, a total of 62 shipments of copper concentration had been exported, valued at \$435 million.

Although production increased steadily since 1975, OMRD suffered losses because of falling copper price, increasing production cost and weakening US dollar. Despite its losses, OMRD

continued its production as Mamut Mine provides training facilities to local people in mining technical know-how. Such expertise will ultimately benefits Sabah.

95% of the 1,150 workers are Malaysians. Some have been sent for training in Japan.

Despite some environmental shortcomings, Mamut Mine has brought considerable economic benefits to Ranau, a rather remote village which is difficult to reach by road.

Now a partner in the venture, Sabah Government is planning to set up a copper smelter which will not only give added value to the mineral but help contribute to the country's industrial development.

Hotel chain coming up

THE majestic 13,456-foot Mt. Kinabalu has long been the major attraction for tourists who flock by the thousands to Sabah every month."

Coupled with the increasing number of businessmen who respond to Sabah Government's open-door investment policy and the resultant

heavy flow of merchants into the State, there has been a shortage of hotel rooms for the last few years.

The problem of finding accomodation has become more acute as more and more development projects have sprang up. As a move to meet such a

challenge and need, Perkasa Hotel Holdings Sdn Bhd was formed, wholly owned by SEDCO.

In November, 1979, together with Southern Pacific Hotel Corp. of Australia. Perkasa Hotel

Holdings formed Kinabalu Inns Sdn Bhd to build run a chain of hotels.

Three hotels have been planned and are

under construction. They are the 75-room, 7-storey Mt. Kinabalu Parkroyal which costs \$9 million, the Kenngau Parkroyal and Tenom Parkroyal, cach of which costs \$8.5 million and both are 6-storeys with 60 rooms.

Nine million dollars has been set aside to build a hotel in Semporna which has only a 9-room hotel

at present. Kinabalu Inns is also studying the possibility of building more hotels in Kudat, Sipitang, Sandakan and Tawau.

Southern Pacific Hotel Corpn., partner in the

joint venture, will help train up Sabahans in hotel management and service. In fact, plans are already in hand to set up a hotel training school in Sabah

60% of the staff for Kinabalu lnns' hotels will be Bumiputras who will learn to equip themselves with adequate expertise in the field to eventually run the business themselves

the Mt. Kinabatu Furkroyat sitti under construction.

Spreading the reading habit

SABAH STATE LIBRARY

Date Established: 8,000 (1974) No. of new readers:

30.314(1979) 204,000 (1974)

No. of books loans: 1 097 000 (1979)

No. of books collected: 34,000 (1974)

253,700 (1979) Break-down of books: 107,338 (Bahasa Malaysia)

83.604 (English) 62.789 (Chinese)

IN a state where books are few and expensive in book shops, government-run libraries have become increasingly important in providing reading materials to the general public and school children.

Such role, admirably, is filled by the Sabah State Library,

Housed in an impressive, distinctively-designed building in the heart of Kota Kinabalu, the Library made an hearty 1,097,000 book loans in 1979. This five-fold increase of borrowings over 1974's figure of 204,000 reflects the initiative and hardwork put in by the Library's Director Mrs. Adeline Leong and her young staff.

The building design is not the only distinctive feature of the Library. The multi-purpose room where you can have film shows to talks and games

children have learned to love. During school holidays, story telling seasions are held. The kids will then be let loose to bury themselves in drawing and painting. Songs too, are sung.

To spread its services as far as possible, the Library's mobile division travels to remote schools and under its bulk loan scheme. 200 books at a time

are loaned to executive clubs of cocoa or oil palm estates in ulu areas.

In the Woolley Collection, named after a colonial administrator, old books and materials on Sabah and Borneo can be found. This unique section boasts of some extremely rare books as far back as the 10th century.

The uniquely-designed, air-conditioned State Library in the heart of Kota Kmabalu.

IN BRIEF....

Dr. M: Sabah can be top state

LABUAN, June. 80:

Deputy Prime Minister Datuk Seri Dr Mahathir said that with its vast potentials, Sabah could become Malaysia's top state.

Rounding up his impression on his five-day in the said he was happy with development in the state, especially in the rural areas. Various agricultural projects which would bring benefit to the rural population have been launched, he said.

During his visit, the Deputy Premier has witnessed the signing of 5 agreements which would bring in \$1,070 million investment money to Sabah.

\$50m woodchip project in Tawau

TAWAU, May, 80:

A \$50 million wood chip plant has been planned by Sabah Softwoods Sdn Bhd for Tawau. It is expected to be operational before 1985. Eventually, woodpulp and paper would also be produced.

Sabah Softwoods is a joint venture between Sabah Foundation and North Borneo Timbers Sdn Bhd.

\$325m iron plant for Sabah

LABUAN, June, 80:

An agreement to set up a \$325 million sponge iron plant in the Rancha Rancha Industrial Estate here has been signed between Sabah Government and Daewoo Industrial Company Limited of South Korea.

Construction contracts for the joint venture project would be awarded this year and the plant would begin production in 1984. Occupying a 90acre site, it could produce 600,000 tons of sponge iron a year, 300 people would be employed.

Negotiations are underway with iron ore suppliers in Australia, Sweden, India, Peru and Brazil to import iron ore, lumps and pellets for the plant.

Half of the finished product would be shipped to South Korea while the rest to Japan, India, Europe, Taiwan, Singapore, Hong Kong and Philippines.

World's biggest prawn farm for Sabah

KOTA KINABALU, June, 80:

A milestone in Sabah's fishing industry was reached when Syarikat Pelihara Udang Sdn Bho obtained a \$5 million loan to develope the world's largest marine prawn culture farm.

The firm, owned by millionaire cocuindustrialist Datuk Hong Teck Guan, will rear for export tiger and white prawns in his 2,000-acreponds at Umas Umas, 50 miles from Tawau.

The first of its kind in South East Asia, the Umas Umas farm will be able to produce about 1,500 tons of prawns annually, when fully developed by 1984. This will bring in a hefty \$20 million to foreign exchange.

Physical work on the \$11 million project begas in May, 1979 and the first haul is expected a August this year.

The \$5 million loan comprised \$3.2 million from Sabah Development Bank and \$1.8 million in him purchasing facilities by Sabah Finance Bhd.

\$31m loan for cocoa project

KOTA KINABALU, June. 80:

Sakilan Desa Sdn Bhd, a cocoa-producing company signed a 531 million loan agreemen with a consortium of six banks to develop 12.88 acres of cocoa land in Sandakan. The banks ar Sabah Development Bank, Bank Bumiputra, Kwonj Yik Bank, Sabah Bank Bhd, Malayan Banking an Bank of Bangkot.

Sakilan Desa is a joint venture between Sakilas Timber Co-Operative Society and KPD. The project costing \$58 million, will provide 1,200 jobs wher fully developed in 1984.

First production of cocoa beans, estimated at 200 tons, is expected in Dec., 1980.

Sabah to get \$15m museum

KOTA KINABALU, June, 80:

The Sabah Government has allocated \$15 million for the construction of a Sabah Museum complex. It will occupy an area of 60 acres and when completed, will become one of the best museums in South East Asia.

8,400 cheap homes for Sabah

KOTA KINABALU, July, 80:

8,400 low-cost houses will be built in the state under the 4th Malaysian Plan. This will be a three-fold increase over the 3rd Malaysian Plan. Costing about \$12,000 a unit, the houses will be built in Kota Knabalt. Sandakan, Tawau, Labuan and Lahad Datu. They will be sold to those who earn between \$500 to \$700 a month.

60% of the units will be offered to bumiputras. The whole project, costing about \$150 million, is undertaken by Sabah Housing and Town Development Authority.

\$17m to ease traffic jams

KOTA KINABALU, Aug. 80:

A new \$17 million dual carriageway will be built along the coast to ease traffic congestion in the state capital.

The road, stretching 4 miles, will be from the town centre to the new international airport terminal at Kepayan.

With the rapid increase of Kota Kinabalu's car population, traffic congestion has become a scrous problem.

Expected to be completed in 1983, the dual carriageway will become the artery road into the state capital.

Sandakan to get \$88m airport

JOHORE BAHRU, Sept., 80:

\$88 million has been allocated by the Federal Government to built a new airport in Sandakan.

The new airport, which will have a runway of 7,000 feet, will be able to handle wide-bodied aircraft like Airbus A300 (Seating capacity: 246) and is expected to be operational by late 1983 or early 1984.

Sandakan, the former capital of British North Borneo and a booming timber town, is expected to go "international" with flights to points like Manila, Hong Kong and Japan.

Sugar project in Down-Under?

KOTA KINABALU, Uct., 80:

Sabah officials are to visit Northera Territory, are growing project there. This is the result of disclussions between Sabah Chief Minister Datuk Amar Harris Salleh and visiting Northern Territory Deputy Chief Minister Mr Marshall Perron.

Sabah has been hit by a shortage of sugar in recent months. It already has a cattle farm in Campfield Northern Territory.

Three-pronged timber policy for Sabah

KUALA LUMPUR, Oct., 80:

The Sabah Government is adopting a threepronged policy for its timber industry which accounts for S5% of its total revenue.

Addressing delegates to the International Investment Seminar here, Sabah Deputy Chief

Minister who is also Minister for Rural and Industrial Development, Datuk James Ongkili outlined the followings:

Progressive reduction of log exports since
 1977. By the end of 1981, total such exports will be

cut by 50%.

 Afforestation and reafforestation. Sabah Forestry Development Authority (SAFODA) is planting trees while reafforestation is done by big timber concessionaries and special licence holders like Sabah Softwoods in Tawau, Shora in Sandakan,

Pacific Hardwoods and Silam Wood Products in Lahad Datu and Sta Innes Melale joint venture with Philippines.

 Development and maximisation of wood based industries at primary, secondary and tertiary levels. These include sawmills, veneer, pulp, paper

mills and furniture and ratan factories.

Datuk Ongkili stated that the days of exporting round logs for quick and large profits were nearing an end. Sabah, he stressed, would now encourage investors to go into joint venture in wood based industries.

\$270m hydro-power project launched

TENOM, Oct., 80:

A \$270 million hydro-electricity project was launched by Chief Minister Datuk Amar Harris Salleh here. The plant which is expected to be

completed by 1983 will have a capacity of 66 megawatt. It will provide adequate power supply to Kota Kinabalu, Tuaran, Papar, Beaufort and Tenom.

Five Italaian and Japanese firms and three local contractors are involved in the construction of the plant.

Kinabalu National Park, one of the 6 gazetted National Parks of Sabah, is Nature in splendour. Adventurous trails abundant with unique & brilliant flowers, birds and butterflies. A sanctuary for rare animals threatened by extinction. Climb lengendary peaks. Or just rest from your labours in a magical environment with all modern comforts. For an inexpensive, invigorating and educational holiday, come to Mount Kinabalu National Park a temperata resort in the tropics.

We are also guardians of other sanctuaries of the ecological, faunal and floral wonders of Sabah at:—

• Turtle Islands • Pulau Gaya • Pulau Tiga •

• Klias Peninsula • Tuwan Hille •

For all enquiries, please contact:— Sabah National Parks, P. O. Box 626, Kota Kinabalu, SABAH, MALAYSIA. Tel: 51595

\$471m fund for SCC

PAPAR. Nov., 80:

The Sabah Credit Corporation (SCC) will get \$471 million from the State Government under the 4th Malaysia Plan for its loan activities.

Disclosing this, Sabah Finance Minister Datuk Haji Mohd. Noor Mansoor sald this fund injection was a tremendous improvement as compared to

the \$21 million allocated to SCC from 1963/1975 period. From 1976 to 1980, SCC got \$33 million. Todate, 14 branches of SCC have been set up

in Sabah.

Stressing the need for SCC to provide small, casy-term loans to the people, especially

Bumiputras, for their commercial and industrial activities, Datuk Haji Mohd. Noor Mansoor said those who need substantial and bigger loans could

approach the Sabah Development Bank.

The huge injection of funds into SCC, he emphasized, was to encourage Bumiputras'

participation in the State's economic development and meet the 30% target under the New Economic Policy by 1980.

\$100m cocoa project for Lahad Datu

KOTA KINABALU, Nov., 80:

A mammoth \$100 million "cocoa under coconut" project covering more than 12,000 acres near Lahad Datu has been launched.

The joint-venture between Sabah's Korporasi Pembangunan Desa (KPD) and Sri-Lanka-based Upali Group will eventually incorporate cocoa and coconut downstream activities including manufacturing of coconut oil, chocolate, cocoa butter and powder.

Initially, 10,000 acres of cocoa and hybrid "Mawa" coconut will be planted. By 1986, down-stream activities will begin. The whole project, one of the biggest undertaken in Sabah, will provide about 2,000 jobs.

\$1 bil timber complex in Kalimantan

KOTA KINABALU, Dec. 80:

The Sabah Government will set up a \$1.1 bil timber complex in East Kalimantan, Indonesia in a joint venture with a giant Indonesian firm, Inhutani.

The project, to be called Sesayap Forest Industries Complex, will produce sawn timber, plywood and pulp and will create about 4,300 jobs. Two new towns will be built with populations of 8,000 and 15,000.

Proposed production of 165,000 tons of bleached pulp is expected to satisfy the requirement of short fibre pulp in paper mills in Indonesia.

Plywood, sawn timber and some logs will also be produced and reafforestation carried out for pulpwood plantation and new trees.

Construction contracts are expected to be awarded in August 1981 and in phases for sawn timber (1983), Plywood (1984) and Pulp (1985). Sahah Chief Minister Datuk Harris Salleh said

the joint venture would further strengthen Sabah and Indonesia's existing close ties. It also would enhance investment links within Asean in general and Indonesia and Malaysia in particular.

Sabah already has one cattle farm in Campfield in Northern Australia and is studying the possibility of starting a sugar cane plantation in Australia to meet the sugar shortage in Sabah.

Essentially, he said, Sabah invested in overseas to secure supplies. It is better to do it cheaply and succeed in other countries than to struggle in our own place and fail, he said.

KK growing fast

A view of the modern Kota Kinabalu. In the background is the Gaya Island.

COMMERCIAL space at Kota Kinabaia is still very much in demand, despite the number of tall shopblocks that have' sprouted in the past few years.

The open-door policy of the Sabah Government has done much to woo foreign investors and commercial buildings continue to mushroom in the State capital.

The most modern town of East Malaysia, Kota Kinabalu derived its name from the majestic Mt. Kinabalu. Before December, 1967, it was called Jesselton after Sir Charles Jessel, Chairman of the British North Borneo Company.

Nicked named "Api Api" — meaning fires the town was burnt twice, once after the 2nd World War and prior to that, by rebel Mat Salleh in 1897.

Today's Kota Kinabalu doubles the 1966 Josselton. Much sea along the Beach Street and Kampung Ayer has been reclaimed, and tall buildings like Wisma Yakim, Hyart Kinabalu International and Wisma Intaraskan had been erected. Two large shopping centres, the Segama and Sinsuran, and a huge central market were also built.

The tallest building, the cone-shaped 30-storey Sabah Foundation Complex, is at Likas, 4 miles from Town.

Under construction in the capital is a mammoth \$70 million sports complex. When completed in 1983, Kota Kinabalu will have the best sporting facilities in Malaysia.

Large areas of land in Likas and Inanam have been opened up for industries. Big names like Tractors Malaysia, Unit Motor Works, John Lysaght, Hargill and Borneo Tractors have all set up factories there.

Kota Kinabalu International Airport, the second largest in Malaysia. is one of the busiest airports in this region. It is an important connecting point to Manila. Bangkok, Hong Kong, Taiwan, Japan and Korea.

The traffic congestion caused by the increasing car population in the town will be eased when the \$17m dual carriageway from the town centre to Kepayan is completed in 1983.

Industrial boom for Labuan

LABUAN - the only free port in Malaysia is rapidly becoming a major industrial area of Sabah

About 12 miles from town and sited in the Rancha Rancha Industrial Estate are some of the State's biggest industries.

The Sabah Shipbuilding, Repairing and Engineering which is the biggest shipyard in East Malaysia had built in 1980 a 2,000-ton cattle carrier and become the local shipyard to produce the biggest-ever locally constructed vessel.

The uniquely-designed Sabah Flour and Feed Mill, a joint venture project between Sabah and Sarawak governments, Minyak Berjaya, an palm oil refinery, Pacific Steel Industries, Tropical Umbrella and the milk factory are transforming the traditional barter trading centre into an important manufacturing town. Coming up near the Rancha Rancha Estate is a massive light industrial area which is being developed by Sabah Economic Development Corporation.

Labuan harbour, one of the best natural ports in Malaysta, had become a berthing ground for some of the world's giant tankers during the energy plut. The head office of Sabah and Sarawak Marine Department is also located in the 37-sq-mile island.

In October 1978, the island made headline in local newspapers when meetings between ASEAN ministries and scholars in the town decided to set up the proposed ASEAN university in Labuan. Geologically. Labuan is at the centre of the ASEAN capitals - from Kuala Lumpur, 970 miles: Singapore, 855 miles; Jakarta, 990 miles; Manila, 740 miles and Bangkok, 1,110 miles.

Barter trade with the Fillipinos who come in Kumpis across the Sulu Sea used to be the mainstream of business here, although in recent years, such activities have declined.

The town which was made a free port in 1956 has not grown very much. There are about 300 shophouses, catering the needs of a small population of about 25,000 people.

Cars, electrical goods and wires in Labuan are priced lower than in main-land Sabah and there are two diamond cutting centres.

About 2 miles from town is the famous Commonwealth Nation Soldiers' Cementery, Very well maintained, it is a commemorative piece for the 3,904 soldiers who died in Borneo and the Philippines during the 2nd World War from 1939-45.

n has become a favourite spot for tourists.

While oil exploited by Sabah Shell from wells around Labuan helps fill the State's coffers, to a very favourable extent, the booming fishing mdustry in the island also makes significant economic contribution.

The 35-strong fleet of fishing trawlers of Nelayan Jayadiri, a government-backed cooperative, bring in rich catches for local consumption se well as overseas markets. A regional training centre on the island, run by Ko-Nelayan, helps turn out new breeds of fishermen.

The Sabah Government and a South Korean industrial giant have signed an agreement to set up a \$325 million sponge iron plant in the island. When fully operational in 1984, the plant could produce 600,000 tons of sponge iron annually.

The booming days as the country's naval base may be over, but Labuan is all set to usher in a new industrial prosperity.

The newly-completed central market of Labuan.

Passengers embarking onto powerful speedboats at Labuan for a journey to Sabah muniland through Menumbok, 14 miles away.

Big things coming to Tawau

TO a visitor who last visited Tawau ten years ago, the town has grown unrecognisable. -

Rows of new shopblocks have been built around the tiny old township and streets which had few pedestrains are now filled with estate workers.

Timber used to be the main industry in this prosperous south-eastern town but in recent years, increasing importance has been given to oil palm and cocoa plantations. Some of the State's largest estates are located here and thousands of Filipinos and Indonesians are employed as manual workers.

Business in the town is brisk but few shops are open in the evening.

Located at the south-eastern point of Sabah, Tawan is only hours away by boat from Nunukan in Indonesia, where there are large timber camps.

The town has probably the most open-air markets in East Malaysia. Huge umbrellas are erected as soon as the dawn breaks - for hawkers sellings vegetables, poultry, clothes and whatnot.

The concrete shophouses appear to be insufficient to cater to the need of the endless streams of people, mostly workers from timber camps and oil palm and cocoa plantations, and two rows of temporary wooden shophouses had been erected along Dunlop Street.

Although the low price of cocoa in the overseas

market is throwing shadow on the faces of the planters. Tawau's future appears secure. Most estate owners believe that the present slump (\$4,000 per ton as against \$7,000 per ton at good times) is temporary.

Besides, serveral big things are coming to the place.

Already, an \$11 million marine prawn culture farm has been developed at Umas Umas, 50 miles for Tawau. Tiger and white prawns will be reared in the 2,000-acre ponds, which is the world's largest marine farm of its kind.

When fully developed by 1984, the farm cas produce 1,500 tons of prawns annually for export bringing in a hefty \$20 million in foreign exchange

Sabah Softwoods, a joint venture between Sahah Foundation and North Borneo Timbers is setting up a \$50 million wood clip plant here It is expected to come on stream by 1985.

The Sabah Government has allocated a massive 564 million to expand the Tawau Port. When fulls completed in 1982, the port will be upgraded to the same status of her two sister ports in Kota Kinabala and Sandakan.

Other smaller projects are also in the pipeline Obviously, the boom of Tawau has only just begun.

A busy scene at the open-air vegetable market at Tawau.

A street clothes vendor having a roaring business by a side land at Tawau.

Doing some bargaining at the poultry market in Tawau — one of the many open-air markets in the boom town.

Sandakan moves steadily

THE best news for Sandakan's residents in years was the government's announcement that an 888 million new international airport would be built for the town.

When the new airport is completed in 1984, Sandakan will become an international point to Manila, Hong Kong, Taiwan and Japan.

The former capital of the North Borneo Government, Sandakan is Sabah's richest town. Its exports of timbers and sea food top the State's chart.

Called the "Small Hong Kong", the town once boasted to have the most night clubs and other entertainment places in Sabah. The timber slump in recent months has slowed down commercial activities but streets in Sandakan are never empty.

An interesting feature of the town is that shophouses have been built in neat rows and big buildings and commercial blocks have been numbered by the Town Board. Bandar Ramai-Ramai, a new sattelite town, is one of the several new townships which have been planned.

The prosperity of Sandakan is reflected by the growing car population. About 30,000 cars are travelling on the few roads and traffic jams often occur.

At peak hours of the day, it is not uncommon for a car to cover a one-mile stretch at Leila Road in half an hour. Fortunately for the drivers, roads in Sandakan town are short.

The Kg. Berhala Low-cost Housing Scheme, about 3 miles from town, is a successful housing project by the government. Most of the occupants are Chinese fishermen.

The Sabah Government, through the Rural Development Corporation, has joint-ventured with Sakilan Timber Co-Operative Society to develop a sprawling 12,388 acres of cocoa land in Sandakan.

A busy scene at Sandakan - the "Small Hong Kong".

Bandar Ramai Ramai a new township in Sandakan, with rows of neatly-arranged shophouses.

A log pond near Sandakan - the timber town of Sabah.

The small, congested Sandakan Airport which will give way to an international standard \$88 million airport.

Some of the hundreds of fishing travlers in Sandakan, a main exporter of sea food for Sabah.

Keningau - a rising star

BY the end of 1981, Keningau town will have grown two-fold, an indication of the tremendous boom this once quiet interior town is periencing.

Already several rows of new shophouses have been built and work is progressing on the construction of a new market, a 4-storey shopping complex, a new cinema, and scores of 3-storey shophouses.

The Sabah Economic Development Corporation is putting up 26 modern commercial buildings and an international-standard, 12-storey hotel with 62 rooms has just been completed.

The boom of Keningau which is the heart of sabah's interior has been brought about by timber concessions in the area. Hundreds of workers have been employed by a joint venture company between Incheape. Kuwaiti corporation and

Malaysian investors in its \$100 million timber project. Their free-spending style has jacked up the cost of living and the sudden boom has attracted property speculators and businessmen. Land prices have soared.

Traditionally, Keningau is noted for its pony breeding and tobacco growing. Today things are changing and the town is rapidly moving towards mountainstion.

The Sabah Government has opened up a 1,000-acre land in Sook Plains, 20 miles from town, for cattle rearing. Big areas of land have been cleared for large-scale farming of cashewnuts, pepper, offee and other cash crops.

Located about 80 miles from Kota Kinabalu, Keningau can be reached by travelling through Penampang, up the mountain ranges to Tambunan and down to the capital of the interior. Frost Keningau. the 12-mile stretch of highway is probably the best road in East Malaysia. The 30 miles from Tambunan, however, is rough ride.

Malaysia Airline System operates regular flights between the State Capital and the fast rising timber town. The journey which costs \$28 takes only about 25 minutes.

Where there were only few cars several years ago, the dust stirred up by busy trucks now hardly settles on the Keningau roads.

When it does, a modern and progressive town will have been born.

The international-standard, 60-room hotel to be called Parkroyal Keningau. nearing completion in Keningau.

The old. 2-storey wooden shophouses which will soon give way to new, multi-storey commercial buildings in Keningau.

The newly-completed 4-storey administrative building at Keningau — ready to cope with the expected increasing task of the fast expanding district.

Israna, Kuching — built in 1870 across Sarawak River, for the Rajah of Sarawak. Originally there were three bungalows and over the last 110 years, various alterations and renovations have been made. As the official residence of the Yang di-Pertua Negen, the Istana serves as venue for many important official functions.

The Court House, Kaching — Built in 1874. Supported by massive brack columns, it was the venue of all Council Negeri meetings from 1878 to 1973. Housing the High Court and subordinate courts, it has an important place in Sarawak history as many important decisions have been made here. The Clock Tower and the Charles Brooke Memorial (front right) were added in 1883 and 1924 respectively.

Surawak Museum — Built in 1891 to permanently house and display Sarawak natives aris and collections of local animals. Alfred Wallace, famous naturalist, who was collecting specimens in Surawak, was instrumental in the conception of the building which has become the most famous museum with the best collections in South East Asia.

Fort Murgherita, Kuching — Built in 1879 across Sarawak River. Communding a long stretch of Sarawak River into Kuching, it was never used as a defending port. It was a prison before being converted into the Sarawak Police Museum.

General Post Office Building, Kuching - Built in 1931, It has become a busy and impressive landmark in the heart of Kuching town.

The Square Tower, Kuching — Built in 1879 for the detention of prisoners and was later used as a fort and dancing hall during the Brooke's rule.

Fort Alice in Simanggang, 2nd Division, Sarawak. Built in 1864, it was used as a fort, Officers' Quarters. Government Offices, Court House and Police Station. Commanding the Batang Luper and constructed entirely of belian wood. Fort Alice is the only fort of its kind as it is square in shape, with a small tower at each inland corner. Its peculiar features are an open courtyard in the centre, a kind of draw-bridge or steps, which could be drawn up in case of attack and a spike tron fence running round the fort perimeter. The fort was used to prevent the powerful Skrang Dayaks from passing through to the sea for their pirutical attacks on ships and head-hutting expeditions against their weaker neighbours, the Balou and Sebuyau Dayaks of Lower Batang Lupar.

Fort Sylvia in Kupit, Ith Division. Sarawak. Built on the left bank of Batung Rejung in 1880, the fort was used to control the warlike activities of the Ibans against the weaker and smaller Ukit and Bukitan groups living in Upper Batang Rejang and the Balleh. It has served as the administrative centre of Kapit.

Fort Lily in Betong, 2nd Division, Sarawak. It was built in 1855 when Betong was surrendered to the Rajah, by the Brunei Sultan. It was later used in defence against attacks by Sadok Dayaks. Originally, it was built of 'nipah' roof but was later replaced with belian timber. The Malays at Muara Padeh built a kampong near the fortress in order to guard it. It now houses some government offices.

Fort Hose in Marudi, Baram, 4th Division of Sarawak. Named after the first District Officer, Mr Hose, it was built in 1901, as a symbol of the town's importance as the capital of Sarawak's 4th Division. The bungalow type fortress on Bukit Kubu has been used by several government offices.

Oil Well No. 1 on Canada Hill in Miri, Sarawak. spedded on Ang. 10, 1910 by Anglo Saxon oil company, it was completed on Dec. 22, 1910, at 452 feet, producing 132 barrels a day. The output on the last day was 7 barrels abandoned on Oct. 3, 1972. In all, 624 oil wells were spudded in Miri by Sarawak Shell. Total outputs 80 million barrels.

The disused coal chimney in Labuan, Sabah. Built in the 30's, it had produced about 200 tons of coal.

The Atkinson Clock Tower at Kota Kinabalu, Sabah (Left: as it stands today and right: before renovation). It was built in 1905 in commemoration of Francis George Atkinson, the son of the first District Officer of Jesselton (now Kota Kinabalu) who died at the age of 28 of "Borneo Fever" on Dec. 6, 1902.

The General Post Office Building at Kota Kinabalu, one of the few historical buildings left in Sabah. It was built in 1932.

A monument at the last fort of Mat Salleh at Kg. Tibaba, Tambunan, 50 miles from Kota Kinabalu, Sabah. Outlaw-cum-folk hero Mat Salleh led a series of revolts against the Charareck Company from 1894 to 1900. It was at this fort that on Feb. 1, 1900 he was killed by the North Borneo Armed Constabulary under the command of Captain Harrington.

A monument at Petagas, Kota Kinabalu, Sabah where Albert Kwok and his men were executed by the Japanese for their Double Tenth Uprising in 1943. Kwok and his guerila lighters, in a surprise attack, chased the Japanese out of Jesselton and later took refuge in Penampang. On Dec. 19, 1943, he surrendered to the hunting Japanese forces. On Jan. 21, 1944, the freedom fighters were executed.

THE ROLE OF KPD IN THE DEVELOPMENT OF SABAH

Korporeal Parmbanguinen Date (RPDs; thr rust development all gency of the State Government of Sabah entrusted with the task of mproving the concinic and social well being of the rural bopulation of Sabah by working with them to ensure maximum utelastation of egicultural potentias to raise their incomes and standard of frings. To carry out these objectives a RPD plays the following roles.

To help encourage the farmer, KPD sets up commercial model farms or works with him on a point venture basis on his land to cuttivate crops on a scientific and productive basis teaching and helping them all the way until he masters all the necessary skills to be a successful farmer of this yown.

To ensure that the people of Sabsh obtain maximum income from their agricultural efforts, RPD etc. participates on their behalf in processing and marketing activities through SAMA and other subsidiaries. This gives added value to the peoples' agricultural efforts and encourages than to progress further.

RPD among other things plays a key role as an involvator and simulator of agricultural progress in the State by exactivities the State by exactivities the spirit of set reliance, among rural communities by encouraging modern progressive commercial learning. This helps to increase their agriculture production and enhance their incorne

To make the socio economic activities of KPD, amid at helping the people, as self funding as possible the corporation through its subcidenes will hivest and participate in agricultural industries and commencial enterprises. The profits derived from these projects will be used in as programme to help the rural people.

KPD also undertakes ejoutural development processor development processor development processor development processor development processor development the secondary concentration for the propriet and to provide employment the set provide employment product of provide propriet product provides and provides and provides and provides and provides and provides and provides stand in socio-encomple process take the carties industry process take the carties industry chapter and batter ball first death of the carties industry chapter and batter ball first death of the carties industry control to the carties industry control to the carties industry control to the carties industry carties and provides and p

BUYING or SELLING

Want to buy or sell any commodity? Come to SAMA, Sabah's official marketing

We export timber, oil palm products. rubber, cocoa and a wide range of agricultural and farm produce; as well as indigenous handicraft - all these are a reflection of this Malaysian State's vast natural and human potential. Our professional and well coordinated services will ensure fast and consistent supply of the quality products you require. Let us determine for you the best buys,

If you are selling, let our team of marketing professionals map out your sales targets. Let us carve out for you your share of the market for optimal profits.

Being the Sabah Government's sole marketing agency, we adhere to stringent standards of professionalism and quality control. We believe in giving the best.

So if you are seeking to expand outlets for your products, be it foreign, local, private or public, bring them to us. We have the connections.

We welcome all enquiries. Contact us for more information.
